Writing from the Core is more than a handbook: it is a roadmap that leads to correct and effective writing. -An effective writing style begins with well-written sentences: sentences that speak to the reader clearly and concisely. - Structure and style cross paths at the sentence core: gain control of the sentence core, and you also gain control of your editing and revising skills. - In fact, once you can edit and revise with skill, you may spend more time mulling over your writing and reaching deeper insight, improving substance as well as style. Writing from the Core takes the mystery out of how to produce correct, clear, and concise writing, building confidence along with skill. I love this approach; it's practical yet personal. Writing from the Core is a guide with personality - it takes theory and makes it real. -Elizabeth Anderson, Writing Instructor, College of DuPage A straight-forward handbook that has been infinitely more useful than any handbook or workbook I've used in college. -Dominic Schiralli, Fine Arts major, Indiana University Northwest Students who use this method have a much easier time with composition. Structure becomes easy, so they can focus on building their writing skills. This is a great method producing fantastic results. - Peggy Patlan, Adult Education Instructor, Moraine Valley Community College

The ability to produce and understand referring expressions is basic to human language use and human cognition. Reference comprises the ability to think of and represent objects (both real and imagined/fictional), to indicate to others which of these objects we are talking about, and to determine what others are talking about when they use a nominal expression. The articles in this volume are concerned with some of the central themes and challenges in research on reference within the cognitive sciences - philosophy (including philosophy of language and mind, logic, and formal

semantics), theoretical and computational linguistics, and cognitive psychology. The papers address four basic questions: What is reference? What is the appropriate analysis of different referring forms, such as definite descriptions? How is reference resolved? and How do speaker/writers select appropriate referring forms, such as pronouns vs. full noun phrases, demonstrative vs. personal pronouns, and overt vs. null/zero pronominal forms? Some of the papers assume and build on existing theories, such as Centering Theory and the Givenness Hierarchy framework; others propose their own models of reference understanding or production. The essays examine reference from a number of disciplinary and interdisciplinary perspectives, informed by different research traditions and employing different methodologies. While the contributors to the volume were primarily trained in one of the four represented disciplines-computer science, linguistics, philosophy and psychology, and use methodologies typical of that discipline, each of them bridges more than one discipline in their methodology and/or their approach.

Effective and practical coaching strategies for new educators Many

teachers are only observed one or two times per year on average—and, even among those who are observed, scarcely any are given feedback as to how they could improve. The bottom line is clear: teachers do not need to be evaluated so much as they need to be developed and coached. In *Get Better Faster: A 90-Day Plan for Coaching New Teachers*, Paul Bambrick-Santoyo shares instructive tools of how school leaders can effectively guide new teachers to success. Over the course of the book, we break down the most critical actions leaders and teachers must take to achieve exemplary results. Designed for coaches as well as beginning teachers, *Get Better Faster* is an integral coaching tool for any school leader eager to help their teachers succeed. It's the book's focus on what's practical and actionable that drives its effective approach to coaching. By practicing the concrete actions and micro-skills listed here, teachers will markedly improve their ability to lead a class, producing a steady chain reaction of future teaching success. Though focused heavily on the first 90 days of teacher development, it's possible to implement this work at any time.
