Lesson Study has been shown to be a systematic way of building teachers’ knowledge by allowing them to share their knowledge with each other. While much has been written about the benefits of Lesson Study in science and mathematics education, this book analyses its impact on education for children with special needs. It studies the ways in which the Lesson Study process is implemented in different educational contexts in the Netherlands, Singapore, the UK, and Sweden—countries which propagate more inclusive learning environments regardless of varying degrees of student capacities. In addition to making transcultural comparisons regarding concepts, procedures, and instruments in the use of Lesson Study in these four countries, this book will provide practice-

based suggestions for teachers to formulate collaborative lesson plans.

The book illustrates how Lesson Study can be applied to craft metacognitive teaching strategies to enhance students’ learning to learn competencies. Based on the findings of an empirical study of a university-funded teaching development project, this book reports how to apply Lesson Study and Learning Study to enhance teachers’ metacognitive teaching competencies with a view to tackling the impacts and challenges created by and underlying the learning to learn curriculum. The book allows readers to experience metacognitive learning by sorting the prior knowledge on the metacognition, setting the goal and planning reading schedule, checking their understanding and progress, evaluating what they have or have not learned and reflected on their reading experience and feelings. Readers can grasp the key concept underpinning metacognitive teaching, including teaching strategies for developing students’ metacognitive abilities that include working on problem-solving activities, working on small collaborative groups, making metacognitive and learning strategies explicit, and encouraging students to reflect upon and talk about their learning.
