The international phenomenon that has sold more than two million copies, *If Cats Disappeared from the World*--now a Japanese film--is a heartwarming, funny, and profound meditation on the meaning of life. This timeless tale from Genki Kawamura (producer of the Japanese blockbuster animated movie *Your Name*) is a moving story of loss and reconciliation, and of one man's journey to discover what really matters most in life. The young postman's days are numbered. Estranged from his family and living alone with only his cat, Cabbage, to keep him company, he was unprepared for the doctor's diagnosis that he has only months to live. But before he can tackle his bucket list, the devil shows up to make him an offer: In exchange for making one thing in the world disappear, the postman will be granted one extra day of life. And so begins a very strange week that brings the young postman and his beloved cat to the brink of existence. With each object that disappears, the postman reflects on the life he's lived, his joys and regrets, and the people he's loved and lost.

These books will equip children with tools necessary to protect themselves from physical, mental, psychological and sexual abuse. Intended to open the lines of communication between adults and children; LTAI books will lead to empowering conversations on 'taboo' topics that will decrease abuse against children. The initial six part series; which will include three books about girls and three books about boys, focuses on the prevention of sexual violence against children. In the first book, "My Body is Special," Eva empowers other children to take ownership of their bodies and provides them with problem solving tools to help prevent an unhealthy touch. Eva teaches children what to say, what to do, where to go and who to tell if they ever feel unsafe around another person.

The goal of the book is for each child who encounters this book to develop their own individual personal plan of action to prevent this type of abuse.

A game-changing model for giving effective feedback to peers, employees, or even your boss--without offending or demotivating. How are you supposed to tell someone that they're not meeting expectations without crushing their spirit? Regular feedback, when delivered skillfully, can turn average performers into the hardest workers and stars into superstars. Yet many see it as an awkward chore: Recent studies have revealed 37% of managers dread giving feedback, and 65% of employees wish their managers gave more feedback. This trail-blazing new model eliminates the guesswork. Dr. Therese Huston, the founding director of the Center for Excellence in Teaching and Learning at Seattle University, discovered that the key to being listened to is to listen. First, find out what kind of feedback an employee wants most: appreciation, coaching, or evaluation. If they crave one, they'll be more receptive once their need has been satisfied. Then Huston lays out counterintuitive strategies for delivering each type of feedback successfully, including: Start by saying your good intentions out loud: it may feel unnecessary, but it makes all the difference. Side with the person, not the problem: a bad habit or behavior is probably less entrenched than you think. Give reports a chance to correct inaccurate feedback: they want an opportunity to talk more than they want you to be a good talker. This handbook will make a once-stressful ordeal feel natural, and, by greasing the wheels of regular feedback conversations, help managers improve performance, trust, and mutual understanding.

For his 2007 critically acclaimed 33 1/3 series title, *Let's Talk About Love*, Carl Wilson went on a quest to find his inner Céline Dion fan and explore how we define ourselves by what we call good and bad, what we love and what we hate. At once among the most widely beloved and most reviled and lampooned pop stars of the past few decades, Céline Dion's critics call her mawkish and overblown while millions of fans around the world adore her "huge pipes" and even bigger feelings. How can anyone say which side is right? This new, expanded edition goes even further, calling on thirteen prominent writers and musicians to respond to themes ranging from sentiment and kitsch to cultural capital and musical snobbery. The original text is followed by lively arguments and stories from Nick Hornby, Krist Novoselic, Ann Powers, Mary Gaitskill, James Franco, Sheila Heti and others. In a new afterword, Carl Wilson examines recent cultural changes in

love and hate, including the impact of technology and social media on how taste works (or doesn't) in the 21st century.

Experts in end-of-life care tell us that we should talk about death and dying with relatives and friends, but how do we get such conversations off the ground in a society that historically has avoided the topic? This

book provides one example of such a conversation. The coauthors take up challenging questions about pain, caregiving, grief, and what comes after death. Their unlikely collaboration is itself connected to death: the murders of two of Irene's closest friends and Steve's support in perpetuating memories of those friends' lives and not just their violent ends. The authors share the results of a no-holds-barred discussion they conducted for several years over email. Readers can consider a range of views on complicated issues to which there are no right answers. Letting ourselves pose certain questions has the potential to profoundly change the way we think about death, how we choose to die, and, just as importantly, the way we live. Honest, probing, sensitive, and even humorous at times, the completely open discussions in this book will help readers deal with a topic that most of us try to avoid but that everyone will face eventually.

LISP is a LISP processing programming language based on John McCarthy's work on nonnumeric computation published in 1960. It is the language of choice for research requiring nonnumeric computation. This text gives a reasonably complete exposition of LISP, but avoids the details of the implementations of the language. The first seven chapters give a slow-paced introduction to the more elementary features of the language, while chapters 8-11 pull together the features not found in previous chapters. Seldom is LISP taught as a first programming language, and so have assumed that the reader of this text knows the mechanics of accessing computers, running programs, and debugging them. Some programming approaches are emphasized, however.
