Kristine Stiles has played a vital role in establishing trauma studies within the humanities. A formidable force in the art world, Stiles examines the significance of traumatic experiences both in the individual lives and works of artists and in contemporary international cultures since World War II. In *Concerning Consequences*, she considers some of the most notorious art of the second half of the twentieth century by artists who use their bodies to address destruction and violence. The essays in this book focus primarily on performance art and photography. From war and environmental pollution to racism and sexual assault, Stiles analyzes the consequences of trauma as seen in the works of artists like Marina Abramovic, Pope.L, and Chris Burden. Assembling rich intellectual explorations on everything from Paleolithic paintings to the Bible's patriarchal legacies to documentary images of nuclear explosions, *Concerning Consequences* explores how art can provide a distinctive means of understanding trauma and promote individual and collective healing.

Blending a behind-the-scenes history about New York City's Public Theater with an engrossing account of her life working alongside her husband, the Public's founder Joe Papp, *Public/Private* is Gail Merrifield Papp's enthralling and highly entertaining memoir about the legendary theatrical institution. Opening with its early days in the Sixties, her narrative spans the decades-long theatrical partnership the couple enjoyed until Joe's death in 1991. During that time, the Public staged hundreds of productions, ranging from free Shakespeare in Central Park to new plays, such as Ntozake Shange's for colored girls who have considered suicide/when the rainbow is enuf, and musicals like *Hair* and *A Chorus Line*—an extraordinary body of work that launched the careers of dozens of actors, including James Earl Jones, Colleen Dewhurst, Gloria Foster, Morgan Freeman, Raúl Juliá, Kevin Kline, George C. Scott, Martin Sheen, Meryl Streep, and Diane Venora, all of whom make an appearance in the book. In a witty conversational style, Gail Papp paints a comprehensive picture of the ways that the Public was driven by Joe's ambition to create a democratic theater whose artists and audiences would reflect the city's population. Also highlighted are unfamiliar aspects of his many battles with the establishment, from tilts with Robert Moses to theater critics. The scourge of AIDS is also documented in the form of people close to Joe and Gail, and in the toll it exacted on Joe's son, Tony. In recounting setbacks and frustrations alongside moments of passionate artistry and theatrical innovation, Gail's personal remembrances lend the narrative a keen, emotional edge which will captivate readers. At a time when America remains divided over issues of equality, identity, and freedom of expression, *Public/Private* is an important chronicle of how the Public Theater became a transformative beacon for social change—and of the man who created it.

No one in Czech politics or culture could match the international stature of V á clav Havel at the time of his death in 2011. In the years since his passing, his legacy has only grown, as developments in the Czech Republic and elsewhere around the world continue to show the importance of his work and writing against a range of political and social ills, from autocratic brutality to messianic populism. This book looks squarely at the heart of Havel ' s legacy: the rich corpus of texts he left behind. It analyzes the meanings of key concepts in Havel ' s core vocabulary: truth, power, civil society, home, appeal, indifference, hotspot, theatre, prison, and responsibility. Where do these concepts appear in Havel ' s oeuvre? What part do they play in his larger intellectual project? How might we understand Havel ' s focus on these concepts as a centerpiece of his contribution to contemporary thought? How does Havel ' s particular perspective on the meaning of these concepts speak to us in the here and now? The ten contributors use a variety of methodological tools to examine the

meaning of these concepts, drawing on a diversity of disciplines: political science and political philosophy, historical and cultural analysis, discourse/textual analysis, and linguistic-corpus analysis.

A play is written, faces censorship and is banned in its native country. There is strong international interest; the play is translated into English, it is adapted, and it is not performed. Censoring Translation questions the role of textual translation practices in shaping the circulation and reception of foreign censored theatre. It examines three forms of censorship in relation to translation: ideological censorship; gender censorship; and market censorship. This examination of censorship is informed by extensive archival evidence from the previously unseen archives of V á clav Havel's main theatre translator, Vera Blackwell, which includes drafts of playscripts, legal negotiations, reviews, interviews, notes and previously unseen correspondence over thirty years with Havel and central figures of the theatre world, such as Kenneth Tynan, Martin Esslin, and Tom Stoppard. Michelle Woods uses this previously unresearched archive to explore broader questions on censorship, asking why texts are translated at a given time, who translates them, how their identity may affect the translation, and how the constituents of success in a target culture may involve elements of censorship.

Articles appear frequently about individuals whose age is noted as a feature of their activism, but the activism of seniors as a growing and influential part of the population is often otherwise overlooked. The speed of change, the expansion of the senior demographic, the growth of citizen participation, and the constant visual images reminding us of these factors, tell us that it is time to look to seniors who are putting their time and energies into helping others and helping the world. Whatever one ' s political view, there is consensus in recognizing that we are living in a time of tremendous change, when traditionally trusted institutions and cultural mores are questioned and seriously challenged. It is a time when more and more individuals feel a need to do something, something about issues that concern them, something that makes them aware of the need for a sense of control in a world in chaos, something that makes them aware of their own strength, power, and the value of the wisdom that comes with age. In a time when social media make shallow "clicktivists" of so many, the people profiled here are true activists. Their dedication crosses all societal lines—ethnic, political, religious, and socio-economic. Some have always considered themselves activists. Some find that this stage of life brings a new perspective that results in the need to do more than say. They tell us, in their own words the what, why, and meaning of their specific activism and show others how to do it. Their stories are inspiring for people of all ages.

An ethnography of terrorism trials in Delhi, India, this book explores what modes of life are made possible in the everyday experience of the courtroom. Mayur Suresh shows how legal procedures and technicalities become the modes through which courtrooms are made habitable. Where India ' s terror trials have come to be understood by way of the expansion of the security state and displays of Hindu nationalism, Suresh elaborates how they are experienced by defendants in a quite different way, through a minute engagement with legal technicalities. Amidst the grinding terror trials—which are replete with stories of torture, illegal detention and fabricated charges—defendants school themselves in legal procedures, became adept petition writers, build friendships with police officials, cultivate cautious faith in the courts and express a deep sense of betrayal when this trust is belied. Though seemingly mundane, legal technicalities are fraught and highly contested, and acquire urgent ethical qualities in the life of a trial: the file becomes a space in which the world can be made or unmade, the petition a way of imagining a future, and investigative and courtroom procedures enable the unexpected formation of close relationships between police and terror-accused. In attending to the ways in which legal technicalities are made to work in everyday interactions among lawyers, judges, accused terrorists, and police, Suresh shows how human expressiveness, creativity and vulnerability emerge through the law.

From food banks to migrant welcome committees, and community organisers to internet based campaigners, civil society is central to the North Atlantic social landscape. *Theology and Civil Society* advances our understanding of what civil society is and offers a theologically informed re-imagining of our shared social life. Prefaced by a foreword by the Rev. Dr Rowan Williams, this book explores contemporary manifestations of the kind of collective action observed in civil society since the 1800s. It then examines civil society as the sum of modern associations which mediate our relationships to the market and the state, but which cannot be identified fully with either the market or the state. Finally, three different perspectives on civil society are presented using insights from theologians such as John Milbank and Georg Hegel. This is a pertinent topic for contemporary society, and it is explored expertly here by an international panel of contributors. As such, it is an important volume for any scholar of Theology and Religious Studies and their interactions with Sociology and Politics.

What do Socrates, Hypatia, Giordano Bruno, Thomas More, and Jan Patočka have in common? First, they were all faced one day with the most difficult of choices: stay faithful to your ideas and die or renounce them and stay alive. Second, they all chose to die. Their spectacular deaths have become not only an integral part of their biographies, but are also inseparable from their work. A "death for ideas" is a piece of philosophical work in its own right; Socrates may have never written a line, but his death is one of the greatest philosophical best-sellers of all time. *Dying for Ideas* explores the limit-situation in which philosophers find themselves when the only means of persuasion they can use is their own dying bodies and the public spectacle of their death. The book tells the story of the philosopher's encounter with death as seen from several angles: the tradition of philosophy as an art of living; the body as the site of self-transcending; death as a classical philosophical topic; taming death and self-fashioning; finally, the philosophers' scapegoating and their live performance of a martyr's death, followed by apotheosis and disappearance into myth. While rooted in the history of philosophy, *Dying for Ideas* is an exercise in breaking disciplinary boundaries. This is a book about Socrates and Heidegger, but also about Gandhi's "fasting unto death" and self-immolation; about Girard and Passolini, and self-fashioning and the art of the essay.

Straightforward histories of post-revolution States have all too often failed to provide sufficient context to rescue revolution, both as concept and practice, from the misplaced triumphalism of the contemporary world. In *Negotiated Revolutions* George Lawson marks a definitive departure in the study of radical political and socio-economic change, presenting a unique comparative analysis of three transformations from authoritarian rule to market democracy. Through the lens of international sociology the book critically considers the large scale processes of social and political revolution, bringing three apparently distinct transformations, from seemingly disparate authoritarian regimes and geographies, under a common rubric. With unique and novel conceptual analysis the book accurately locates both the potential and actuality of radical change in contemporary world affairs, processes usually mistakenly subsumed under the general framework of 'transitology'.

Aquinas ' theology can be understood only if one comes to grips with his metaphysics of being. The relevance of this perspective is exhibited in his treatment of topics like creation, goodness, happiness, truth, freedom of the will, the unity of the human being, prayer and providence, God ' s personhood, divine love, God and violence, God ' s unknowability, the Incarnation, the Trinity, God ' s existence, theological language and even laughter. This book endeavors to treat these questions in a clear and convincing language. Is there a better method for improving one ' s own theology than by grappling with the arguments of Thomas Aquinas?

Like the renowned American writer Edmund Wilson, who began to learn Hungarian at the age of 65, Richard Teley started his study of that difficult language as an adult. Unlike Wilson, he is a third-generation Hungarian American with a strong desire to understand how his ethnic background has affected the course of his life. "Exploring my ethnicity," he writes, "became a way of exploring the arbitrary nature of my own life. It was not so much a search for roots as for a way of understanding rootlessness - how I

stacked up against another way of being. ” He writes with clarity, perception, and humor about a subject of importance to many Americans - reconciling their contemporary identity with a heritage from another country. From an examination of photographer Andre Kertesz to a visit to a Hungarian American church in Cleveland, from a consideration of stereotypical treatment of Hungarians in North American fiction and film to a description of the process of translating Hungarian poetry into English, Teleky ’ s interests are wide-ranging. he concludes with an account of his first visit to Hungary at the end of Soviet rule.

Today, the Tower of London is a tourist site, home only to the crown jewels, but not long ago the imposing structure held traitors, political prisoners, and more, often on their way to the chopping block. Even outside of this famous building, prisons have changed radically since the Norman Conquest in 1066. In the first book on the history of prisons in Britain, former prison governor and professor of criminology David Wilson offers unrivaled insight into the penal system in England, Scotland, and Wales, charting the rise and fall of forms of punishments that take place behind their walls. Pain and Retribution explores prisons as an institution and examines how they are designed, organized, and managed. Wilson reveals that prisons have to satisfy the demands of three interested parties: the public, from politicians and media commentators to everyday citizens; the prison staff; and the prisoners themselves. He shows how prevailing concerns and issues of the times allow one faction or another to have more power at varying points in history, and he considers how prisons are unable to satisfy all three at the same time—leading to the system being seen as a failure, despite rising numbers of prisoners and growing funds invested in keeping them incarcerated. With intriguing comparisons between the prisons of New York City and Britain and searching questions about the purposes of the current penal system, Pain and Retribution provides unparalleled access to prison landings, staffs, and the people behind the locked doors.

This authorized biography of Havel, based on unrestricted access to him, his circle, and even his enemies, is not only the first definitive account of one of the modern world’s great moral and political leaders but also a vivid panorama of the tumultuous events of his times. Havel’s life, like that of his African counterpart Nelson Mandela, has been shaped and determined by the large political shifts of the twentieth century. Readers will taste the moments of joy, irony, farce, and misfortune through which he has lived, and realize that he has taught the world more about the powerful and the powerless, power-grabbing and power-sharing, than virtually anyone else on the world stage.

Artificial intelligence (AI) permeates Google searches, the personal assistants in our smartphones, and is all over our newsfeeds. Watson’s machine learning has already started to revolutionize many important industries including oncology, law, finance, and entertainment. The idea that man is about to increase his immediate surroundings with exponential gains in the level of intelligence over the coming generations is based upon a technological revolution and the potential for artificial superintelligence (ASI). It is within this context that there is a prevailing need for a discussion of its ethical implications. As a Christian ethicist, Paul Golata believes that the need for this conversation to be informed by Christian principles is imperative. ASI is a move toward the proper handling of information. However, how a society interprets and applies this information is actually more pertinent than the raw amount of information it possesses. This important ethical conversation is being led by humanistic thinkers who assume that all of reality is just matter in motion and that mind is nothing more than electrochemical activity in the “wetware” of human brains. The Ethics of Superintelligent Design critically examines and challenges some of the most important trajectories of ASI while upholding the authority and inerrancy of the Bible, the supernatural creation account, a realistic view of the state of humanity, and biblical ethics.

Why “ hopeful pessimism ” is not a contradiction in terms but a powerful source of moral and political commitment The climate debate is rife with calls for optimism. While temperatures rise and disasters intensify, we are asked to maintain optimism and hope, as if the real threat is pessimism and despair. In this erudite and engaging book, Mara van der Lugt argues that this is a mistake: crude optimism can no longer be a virtue in a breaking world, and may well prove to be our besetting vice. In an age of climate change and ecological devastation, the virtue we need is hopeful pessimism. Drawing on thinkers that range from J.R.R.Tolkien and Mary Shelley to Albert Camus and Jonathan Lear, Van der Lugt invites us to rethink what we thought we knew about optimism and pessimism, hope and despair, activism and grief. She shows that pessimism is closely linked to a tradition of moral and political activism, and offers a different way to think about pessimism: not as synonymous with despair but as compatible with hope. Gently yet fiercely, Van der Lugt argues that what we need to avoid is not pessimism but fatalism or self-serving resignation. Pessimism does not imply the loss of courage or the lack of a desire to strive for a better world; on the contrary, these are the very gifts that pessimism can bestow. What Hopeful Pessimism asks instead is that we strive for change without certainties, without expecting anything from our efforts other than the knowledge that we have done what we are called upon to do as moral agents in a time of change.

Czechoslovakia has been at the center of some of the most difficult--and tragic--episodes of modern European history: its sacrifice to Nazi Germany at Munich; the Communist Coup of 1948; and the military crushing of the Prague Spring. It has also enacted momentous change almost magically, as in the peaceful overthrow of communism in 1989, and then the negotiated end to the country in 1992. Czechoslovak history has consequently produced enduring political metaphors for our times, such as the Velvet Revolution and Velvet Divorce. The second

edition of the Historical Dictionary of the Czech State has been thoroughly updated and greatly expanded. Featuring a chronology, introductory essay, appendix, bibliography, and hundreds of cross-referenced dictionary entries, this detailed, authoritative reference provides understandings of the Czechs as a people; the territory they inhabit; their social, cultural, political, and economic developments throughout history; and interactions with their neighbors and the wider world.
