There is also a proliferating body of 'soft law' addressing terrorism, stemming from United Nations organs, specialised international bodies and regional organisations. It is timely to draw together these diverse legal developments over time into a single reference work. Bringing the original documents together provides for ease of reference and enables scholars, practitioners and students to more easily compare and contrast various sources. The book's coverage is comprehensive (thematically, organisationally, geographically and temporally) and open to a balance of sources (hard and soft), but is judicious in its selection and

prioritisation of the most significant and representative documents - in a field where there are many repetitive or insubstantial documents. Importantly, the book looks beyond the traditional trans-Atlantic bias towards European, British and American sources in this area to include materials from Asia, Africa, Latin America and the Middle East. Taken as a whole, the book aids in evidencing the emerging field of international anti-terrorism law. Congressional Record Elsevier War, Terror and Carriage by Sea provides a comprehensive legal analysis of the

law and practice relating to the impact of war or war related risks, terrorism and piracy on international commercial shipping. It includes a detailed review of:

- International Hull Clauses, the Institute War and Strikes Clauses, and by the P&I Associations and War Risk Associations in respect of war, war related, terrorist and associated risks
- The impact of the threat or occurrence of such risks on international carriage by sea

As well as providing a background to the cruise industry, it also looks deeper into the management issues providing a practical guide for both students and professionals alike. A user-friendly and practical guide it discusses issues such

as: · The history and image of cruising · How to design a cruise and itinerary planning · Roles and responsibilities on a cruise ship · Customer service systems and passenger profiles · Managing food and drink operations onboard · Health, safety and security · Cruise Operations Management presents a range of contextualised facts illustrated by a number of case studies that encourage the reader to examine the often complex circumstances that surround problems or events associated to cruise operations. The case studies are contemporary and

and are constructed from first hand research with a number of international cruise companies providing a real world insight into this industry. Each case study is followed by questions that are intended to illuminate issues and stimulate discussion. The structure of the book is designed so the reader can either build knowledge cumulatively for an in-depth knowledge of managerial practices and procedures onboard a cruise ship, or they can ‘ dip in ’ and make use of specific material and case studies for use within a more generic hospitality or tourism learning context.

Ports are the vital hubs of the maritime transport industry, and crucial to the flow of global trade. The protection of this global supply chain from crime and terrorism is a fundamental objective of port security, and is a landscape beset by

new challenges and changes post 9/11. Building on multi-sited ethnographic fieldwork in two major European ports, Yarin Eski discusses how operational policing and security realities and identities are established, and examines how industrial commercialization has aggravated security issues. Policing, Port Security and Crime Control offers a compelling empirically balanced account of the attitudes and practices of port police officers and security officers, exploring the everyday realities and ambitions of these street-level professionals as they seek to (re)establish a meaningful occupational identity. In doing so, this book presents a

criminological understanding of the way that security questions and procedures are integrated into the daily lives of those that protect the industrial port sites, where they themselves must interrupt the global supply chain in order to defend it. Exploring topics such as port security management, multi-agency policing, port theft, drug trafficking, human smuggling and terrorism, this book offers a major contribution to the growing literature on transnational crime and security and is one of the first to offer an ethnographic approach to port security. This book is interdisciplinary and will appeal to criminologists, sociologists,

ethnographers and those engaged with policing and security studies, as well as professionals in the field of multi-agency policing, border control, security and governance of the port and wider maritime industry.

The 1982 United Nations Convention on the Law of the Sea (UNCLOS) remains the cornerstone of global ocean governance. However, it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically. With seemingly no opportunity for revision due to the Conventions burdensome

amendment provisions, complementary mechanisms dealing with such aspects of global ocean governance including maritime transport, fisheries, and marine environmental sustainability, have been developed under the aegis of the United Nations and other relevant international organizations. This approach is inherently fragmented and unable to achieve sustainable global ocean governance. In light of the Sustainable Development Goals (SDGs),

particularly Goal 14, the IMLI Treatise proposes a new paradigm on the basis of integrated and cross-sectoral approach in order to realise a more effective and sustainable governance regime for the oceans. The volume examines how the IMO, with 171 Member States and 3 Associated Members, has and continues to promote the goals of safe, secure, sound, and efficient shipping on clean oceans. It studies the interface and interaction between UNCLOS and IMO instruments and how IMOs

safety, security, and environmental protection conventions have contributed to global ocean governance, including the peaceful order of the polar regions. War, Terror and Carriage by Sea Government Printing Office The International Foundation for Protection Officers (IFPO) has for many years provided materials to support its certification programs.
