Geographical Aesthetics places the terms 'aesthetics' and 'geography' under critical question together, responding both to the increasing calls from within geography to develop a 'geographical aesthetics', and a resurgence of interdisciplinary interest in conceptual and empirical questions around geoaesthetics, environmental aesthetics, as well as the spatialities of the aesthetic. Despite taking up an identifiable role within the geographical imagination and sensibilities for centuries, and having what is arguably a key place in the making of the modern discipline, aesthetics remains a relatively under-theorized field within geography. Across 15 chapters Geographical Aesthetics brings together timely commentaries by international, interdisciplinary scholars to rework historical relations between geography and aesthetics, and reconsider how it is we might understand aesthetics. In renewing aesthetics as a site of investigation, but also an analytic object through which we can think about worldly encounters, Geographical Aesthetics presents a reworking of our geographical imaginary of the aesthetic.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

In Kids These Days, early Wall Street occupier Malcolm Harris gets real about why the Millennial generation has been wrongly stereotyped, and dares us to confront and take charge of the consequences now that we are grown up. Millennials have been stereotyped as lazy, entitled, narcissistic, and immature. We've gotten so used to sloppy generational analysis filled with dumb clichés about young people that we've lost sight of what really unites Millennials. Namely: We are the most educated and hardworking generation in American history. We poured historic and insane amounts of time and money into preparing ourselves for the 21st-century labor market. We have been taught to consider working for free (homework, internships) a privilege for our own benefit.

We are poorer, more medicated, and more precariously employed than our parents, grandparents, even our great grandparents, with less of a social safety net to boot. Kids These Days is about why. In brilliant, crackling prose, early Wall Street occupier Malcolm Harris gets mercilessly real about our maligned birth cohort.

Examining trends like runaway student debt, the rise of the intern, mass incarceration, social media, and more, Harris gives us a portrait of what it means to be young in America today that will wake you up and piss you off. Millennials were the first generation raised explicitly as investments, Harris argues, and in Kids These Days he dares us to confront and take charge of the consequences now that we are grown up.
