Practice Makes Perfect Chemistry Review and Workbook, Second Edition John Wiley & Sons Touted as the most successful NSF-funded project published, Chemistry in the Community (ChemCom) by the American Chemical Society (ACS) offers a meaningful and memorable chemistry program for all levels of high school students. ChemCom covers traditional chemistry topics within the context of societal issues and real-world scenarios. Centered on decision-making activities where students are responsible for generating data in an investigating, analyzing that data and then applying their chemistry knowledge to solve the presented problem. The text is intensively laboratory-based, with all 39 of the investigations integrated within the text, not separate from the reading. With the ChemCom program,

students learn more organic and biochemistry, more environmental and industrial chemistry, and more on the particulate nature of matter than other textbooks all within the relevance of solving problems that arise in everyday life. Meticulously updated to meet the needs of today's teachers and students, the new sixth edition of ChemCom adheres to the new science framework as well as the forthcoming next generation of science standards. Incorporating advances in learning and cognitive sciences, ChemCom 's wide-ranging coverage builds upon the concepts and principles found in the National Science Education Standards. Teaching all of the necessary concepts within the constraints of a one-term chemistry course can

be challenging. Authors Denise Guinn and Rebecca Brewer have drawn on their 14 years of experience with the one-term course to write a textbook that incorporates biochemistry and organic chemistry throughout each chapter, emphasizes cases related to allied health, and provides students with the practical quantitative skills they will need in their professional lives. Essentials of General, Organic, and Biochemistry captures student interest from day one, with a focus on attention-getting applications relevant to health care professionals and as much pertinent chemistry as is reasonably possible in a one term course. Students value their experience with chemistry, getting a true sense of just how relevant it is to their chosen profession.
