Imagine sending a magazine article to 10 friends-making photocopies, putting them in envelopes, adding postage, and mailing them. Now consider how much easier it is to send that article to those 10 friends as an attachment to e-mail. Or to post the article on your own site on the World Wide Web. The ease of modifying or copying digitized material and the proliferation of computer networking have raised fundamental questions about copyright and patent â € "intellectual property protections rooted in the U.S. Constitution. Hailed for quick and convenient access to a world of material, the Internet also poses serious economic issues for those who create and market that material. If people can so easily send music on the Internet for free, for example, who will pay for music? This book presents the multiple facets of digitized intellectual property, defining terms, identifying key issues, and exploring alternatives. It follows the complex threads of law, business, incentives to creators, the

American tradition of access to information, the international context, and the nature of human behavior. Technology is explored for its ability to transfer content and its potential to protect intellectual property rights. The book proposes research and policy recommendations as well as principles for policymaking.

But if you try to go it alone, the credit repair journey can be a nightmare. This book introduces a step-by-step credit repair system, actual documents the author used to settle suits, and legal cases filed in federal courts against major credit bureaus. Contrary to what you may believe, there is a way to improve your credit score substantially, and this book will help you get there. The author was a vice president at Guardian Bank in charge of the collection department and went on to start a collection agency. After selling the agency he became a credit restoration coach. To prove what he knew in theory could in fact be done, he stopped paying everything: repossession, foreclosure, medical bills, student loans, and credit cards. He even filed for bankruptcy. His credit score went from over 800 down to 461. He had it back to 742 in five months. Mr. Mansfield walks you through every step of the credit restoration process.
