Managing Data in Motion describes techniques that have been developed for significantly reducing the complexity of managing system interfaces and enabling scalable architectures. Author April Reeve brings over two decades of experience to present a vendor-neutral approach to moving data between computing environments and systems. Readers will learn the techniques, technologies, and best practices for managing the passage of data between computer systems and integrating disparate data together in an enterprise environment. The average enterprise's computing environment is comprised of

hundreds to thousands computer systems that have been built, purchased, and acquired over time. The data from these various systems needs to be integrated for reporting and analysis, shared for business transaction processing, and converted from one format to another when old systems are replaced and new systems are acquired. The management of the "data in motion" in organizations is rapidly becoming one of the biggest concerns for business and IT management. Data warehousing and conversion, real-time data integration, and cloud and "big data" applications are just a few of the challenges facing organizations and businesses today. *Managing Data in Motion* tackles these and other topics in a style easily understood by business and IT managers as well as programmers and architects. Presents a vendor-neutral overview of the different technologies and techniques for moving data between computer systems including the emerging solutions for unstructured as well as structured data types

Explains, in non-technical terms, the architecture and components required to perform data integration Describes how to reduce the complexity of managing system interfaces and enable a scalable data architecture that can handle the dimensions of "Big Data"

Hiring highly qualified people is crucial to every company, and Background Screening and Investigations is an essential guide to succeeding in a turbulent business environment. A crucial part of any hiring process should be employment background screening, pre- and post-hire, which gives hiring personnel a glimpse into a person's past behavior patterns, propensities, and likely future behavior. Background Screening and Investigations describes all

aspects of the employment background screening processes - its history and evolution, the imperative for implementing a screening process, and the creation of a comprehensive policy. Nixon and Kerr show how security and human resources professionals can work together to negotiate legal hurdles and make their background screening process successful. * Where do HR and security perspectives differ on hot topics like hiring convicted felons, data protection, and sexual predators? * What does state law allow when screening job candidates? * How should companies deal with emerging issues like international background investigations and continuous (Infinity) screening of current employees?

Matthew Bender Practice Guide: California E-Discovery and Evidence LexisNexis
"Data-driven criminal justice operations creates millions of criminal records each year in the United States. Documenting everything from a police stop to a prison sentence, these records take on a digital life of their own as they are collected and posted

by police, courts, and prisons, and then re-posted on social media, online news and mugshot galleries, and bought and sold by data brokers as an increasingly valuable data commodity. The result is "digital punishment," where mere suspicion or a brush with the law can have lasting consequences. This analysis describes the transformation of criminal records into millions of data points, the commodification of this data into a valuable digital resource, and the impact of this shift on people, society, and public policy. The consequences of digital punishment, as described in hundreds of interviews detailed in this book, lead people to purposefully opt out of society as they cope with privacy and due process violations"--

Managing Data in Motion Edward Elgar Publishing
In our digital world, data is power. Information hoarding businesses reign supreme, using intimidation, aggression, and force to maintain influence and control. Sarah Lamdan brings us into the unregulated underworld of these "data cartels", demonstrating how the entities mining, commodifying, and selling our data and informational resources perpetuate social inequalities and threaten the democratic sharing of knowledge. Just a few companies dominate most of our critical informational resources. Often self-identifying as "data analytics" or "business solutions" operations, they supply the digital lifeblood that flows through the circulatory system of the internet. With their control over data, they can prevent the free flow of information, masterfully exploiting outdated information and privacy laws and curating online information in a way that amplifies digital racism and targets marginalized communities. They can also distribute

private information to predatory entities.

Alarmingly, everything they're doing is perfectly legal. In this book, Lamdan contends that privatization and tech exceptionalism have prevented us from creating effective legal regulation. This in turn has allowed oversized information oligopolies to coalesce. In addition to specific legal and market-based solutions, Lamdan calls for treating information like a public good and creating digital infrastructure that supports our democratic ideals.

This volume explores the various strategies, mechanisms and processes that influence rule of law dynamics across borders and the national/international divide, illuminating the diverse paths of influence. It shows to what extent, and how, rule of law dynamics have changed in recent years, especially at the transnational and international levels of government. To explore these interactive dynamics, the volume adopts an interdisciplinary approach, bringing together the normative perspective of law with the analytical perspective of social sciences. The volume contributes to several fields, including studies of rule of law, law and development, and good governance; democratization; globalization studies; neo-

institutionalism and judicial studies; international law, transnational governance and the emerging literature on judicial reforms in authoritarian regimes; and comparative law (Islamic, African, Asian, Latin American legal systems).
