**DISCIPLE IV UNDER THE**

**TREE OF LIFE** is the final study in the four-phase DISCIPLE program and is prepared for those who have completed **BECOMING DISCIPLES THROUGH BIBLE STUDY**.

The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for **DISCIPLE IV: UNDER THE TREE OF LIFE**. The word under in the title is meant to convey invitation, welcome, sheltering, security,

and rest - home at last.

Commitment and Time Involved  
32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

Too often literary criticism is academic exercise rather than creative act. For the multifaceted Julio Ortega—respected poet, dramatist, and novelist in his own right—the act of criticism becomes profoundly creative, his incisive readings of the text far transcending the pedantry that may falsely pass for imagination, intelligence, and rigor. Nearly every Spanish-American writer of consequence, from Paz to

---

Fuentes, Cort á zar to Lezama Lima, has extolled Ortega ' s criticism as not merely a reflection but an essential part of the renaissance that took place in Spanish-American letters during the late twentieth century. Poetics of Change brings together Ortega ' s most penetrating and insightful analyses of the fiction of Borges, Fuentes, Garc í a M á rquez, Carpentier, Rulfo, Cabrera Infante, and others responsible for great writing from Spanish America. Ortega concerns himself most with the semantic innovations of these masters of the modern narrative and their play with form, language, and the traditional boundaries of genre. Mapping their creative territory, he finds that the poetics of Spanish-American writing is that of a dynamically changing genre that has set exploration at its very heart. Tauris The authors trace the emergence of Ataturk and Reza Shah through the constitutional revolutions in Iran and the Ottoman Empire, which led to the introduction of European social models, the establishment of dictatorship and of secularist reforms. This produced in both Turkey and Iran highly authoritarian, nationalist, and quasi-westernised states, where the personality cult of the leader defined the politics of each country." Celia was paying Jethro to be her husband—so she was disconcerted to discover Jethro was actually a multimillionaire. Why had he agreed to marry—if he didn't need the money...?

All Celia had wanted to do was grant her dying father's wish to see her happily married. Now she must spend day and night pretending to be madly in love with her gorgeous new groom. And, although she'd stipulated "no sex" in the contract, it was exactly that clause she was finding impossible to keep....

More confiding than Faraday, Lakhovsky has told me the gist of his ideas on radiations and their effects on living beings.

He thought, and rightly, that his ideas could not shock an experimenter who, for the past thirty-five years, had studied the effects of the full range of Hertzian waves on animals and microbes. In scientific research it is advisable to encourage what appears to be the most daring ideas. I have lived in the intimacy of two great men: Claude Bernard and Brown-Sequard, who revelled in new ideas. And it did not pay them too badly! The phenomena of resonance have long been familiar to physiologists. We all know the acoustic resonators of the organ of Corti, the optic resonators of the retina since the famous researches of Helmholtz. And still more familiar to us, the biological resonators of Charles Henry. Lopicque, Latzareff and myself have invoked on several occasions the phenomena of cellular resonance in order to explain the action of nervous influences or other physical

---

agents in living beings. That space is full of forces which are unknown to us, and that living beings emit radiations or effluvia of which we are not aware, but whose significance has attracted the attention of certain observers, are facts that I have long since accepted. Anything is possible. But one must not accept anything except that which can be experimentally proved. The ideas of an insane person differ from the conceptions of a genius mainly because experiment invalidates the former and confirms the latter. Lakhovsky, encouraged by his own researches and the practical results he has obtained, is particularly anxious that his theories should rouse interest and stimulate experimental work among independent investigators. Lakhovsky's theories constitute what Claude Bernard called "working hypotheses." In the "Secret

of Life" Lakhovsky confines himself to the study of electromagnetic waves, deeply penetrating waves and unknown waves. There are certainly many more processes of energy transmission besides those revealed to us by Newton and Fresnel. It is in the study of human beings that the chances of discovering such processes are most promising. Therefore, let us experiment by using the methods of physicists and chemists, and let us aim at discovering the special detector mentioned in the conclusion of this work.

Cliff Richard has been Britain ' s longest surviving and most consistent hit music

maker. Starting his career as a rock ' n ' roll threat to decent, upstanding citizens, he is now a friend to Royalty and prime ministers, a Knight, and a holder of the OBE. This book tells his story chronologically, through the voices of his friends, family, and colleagues including songwriters, film directors, managers, and agents—like listening in on a dinner party attended by most of the key people in his career. The stories reveal Cliff as seen by those closest to him and, in contrast to the many official publications, this book does not just include the flattering stories. The author ' s probing questions have elicited extraordinary memories and observations, previously unheard by the public. Heavily illustrated with rare and interesting photographs of Cliff at work and play, this unique oral history will stand as a lasting testament to one of the
