The Secret of Life Carlton Books Limited

The authors trace the emergence of Atatürk and Reza Shah through the constitutional revolutions in Iran and the Ottoman Empire, which led to the introduction of European social models, the establishment of dictatorship and of secularist reforms. This produced in both Turkey and Iran highly authoritarian, nationalist, and quasi-westernised states, where the personality cult of the leader defined the politics of each country."

Too often literary criticism is academic exercise rather than creative act. For the multifaceted Julio Ortega—respected poet, dramatist, and novelist in his own right—the act of criticism becomes profoundly creative, his incisive readings of the text far transcending the pedantry that may falsely pass for imagination, intelligence, and rigor. Nearly every Spanish-American writer of consequence, from Paz to Fuentes, Cortázar to Lezama Lima, has extolled Ortega's criticism as not merely a reflection but an essential part of the renaissance

that took place in Spanish-American letters during the late twentieth century. Poetics of Change brings together Ortega's most penetrating and insightful analyses of the fiction of Borges, Fuentes, García Márquez, Carpentier, Rulfo, Cabrera Infante, and others responsible for great writing from Spanish America. Ortega concerns himself most with the semantic innovations of these masters of the modern narrative and their play with form, language, and the traditional boundaries of genre. Mapping their creative territory, he finds that the poetics of Spanish-American writing is that of a dynamically changing genre that has set exploration at its very heart.

This book provides an overview of the ACCESS program, a mental health program that has been developed and tested as an efficacious treatment for college students with ADHD. This program is at the cutting edge of clinical research, incorporating treatment strategies that allow for dissemination in real world settings in order to effectively assist college students experiencing difficulties in their academic, personal, social, and emotional functioning. As cognitive behavioral approaches have proved to be the most successful psychological treatments to date, the techniques in this volume follow that model in a detailed and nuanced fashion. The authors provide a week by week breakdown of the program, supplemented by handouts and worksheets designed to facilitate better understanding of the areas targeted by the program. Filling a notable gap in research addressing the ADHD college student population, CBT for College Students with ADHD is a crucial resource for campus mental health practitioners as well as a broad range of clinicians dealing with emerging adults.

More confiding than Faraday, Lakhovsky has told me the gist of his ideas on radiations and their effects on living beings. He thought, and rightly, that his ideas could not shock an experimenter who, for the past thirty-five years, had studied the effects of the full range of Hertzian waves on animals and microbes.

In scientific research it is advisable to encourage what appears to be the most daring ideas. I have lived in the intimacy of two great men: Claude Bernard and Brown-Sequard, who revelled in new ideas. And it did not pay them too badly! The phenomena of resonance have long been familiar to physiologists. We all know the acoustic resonators of the organ of Corti, the optic resonators of the retina since the famous researches of Helmholtz.

And still more familiar to us, the biological resonators of Charles Henry. Lopicque, Latzareff and myself have invoked on several occasions the phenomena of cellular resonance in order to explain the action of nervous influences or other physical agents in living beings. That space is full of forces which are unknown to us, and that living beings emit radiations or effluvia of which we are not aware, but whose significance has attracted the attention of certain observers, are facts that I have long since accepted. Anything is possible. But one must not accept anything except that which can be experimentally proved. The ideas of an insane person differ from the conceptions of a genius mainly because experiment invalidates the former and confirms the latter. Lakhovsky, encouraged by his own researches and the practical results he has obtained, is particularly anxious that his theories should rouse interest and stimulate experimental work among independent investigators. Lakhovsky's theories constitute what Claude Bernard called "working hypotheses." In the "Secret of Life" Lakhovsky confines himself to the study of electromagnetic waves, deeply penetrating waves and unknown waves. There are certainly many more processes of energy transmission besides those revealed to us by Newton and Fresnel. It is in the study of human beings that the chances of discovering such processes are most promising. Therefore, let us experiment by using the methods of physicists and chemists, and let us aim at discovering the special detector mentioned in the conclusion of this work.

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES

THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler

life of New Testament times.

The Great Reawakening did not come quietly. Across the country and in every nation, people began to develop terrifying powers—summoning storms, raising the dead, and setting everything they touch ablaze. Overnight the rules changed...but not for everyone. Colonel Alan Bookbinder is an army bureaucrat whose worst war wound is a paper-cut. But after he develops magical powers, he is torn from everything he knows and thrown onto the front-lines. Drafted into the Supernatural Operations Corps in a new and dangerous world, Bookbinder finds himself in command of Forward Operating Base Frontier—cut off, surrounded by monsters, and on the brink of being overrun. Now, he must find the will to lead the people of FOB Frontier out of hell, even if the one hope of salvation lies

in teaming up with the man whose own magical powers put the base in such grave danger in the first place—Oscar Britton, public enemy number one...
