Since its publication, the first edition of Fingerprints and Other Ridge Skin Impressions has become a classic in the field. This second edition is completely updated, focusing on the latest technology and techniques—including current detection procedures, applicable processing and analysis methods—all while incorporating the expansive growth of literature on the topic since the publication of the original edition. Forensic science has been challenged in recent years as a result of errors, courts and other scientists contesting verdicts, and changes of a fundamental nature related to previous claims of infallibility and absolute individualization. As such, these factors represent a fundamental change in the way training, identifying, and reporting should be conducted. This book addresses these questions with a clear viewpoint as to where the profession—and ridge skin identification in particular—must go and what efforts and research will help develop the field over the next several years. The second edition introduces several new topics, including Discussion of ACE-V and research results from ACE-V studies Computerized marking systems to help examiners produce reports New probabilistic models and decision theories about ridge skin evidence interpretation, introducing Bayesnet tools Fundamental understanding of ridge mark detection techniques, with the introduction of new aspects such as nanotechnology, immunology and hyperspectral imaging Overview of reagent preparation and application Chapters cover all aspects of the subject, including the formation of friction ridges on the skin, the deposition of latent marks, ridge skin mark identification, the detection and enhancement of such marks, as well the recording of fingerprint evidence. The book serves as an essential reference for practitioners working in the field of fingermark detection and identification, as well as legal and police professionals and anyone studying forensic science with a view to understanding current thoughts and challenges in dactyloscopy.

Meditations on the Lord's Prayer Elsevier

Microsoft Outlook Programming unleashes the power of Microsoft Outlook, allowing administrators and end users to customize Outlook in the same way that they've used macros and templates to customize other programs like Excel and Word. Experienced developers will find the quick-start information they need to

begin integrating Outlook into their applications. Microsoft Exchange administrators will get help automating common tasks such as announcing public folders and importing data to custom forms. Microsoft Outlook is the most widely used email program, and it offers the most programmability. This book introduces key concepts for programming both Outlook forms for storing and exchanging data and Visual Basic for Applications modules that add new features to Outlook. Central to this new edition, which covers both Outlook 2000 and Outlook 2002, is awareness of tighter security in Outlook. Designed to prevent transmission of computer viruses, the security restrictions can also get in the way of legitimate programs, but this book offers workarounds within the reach of novice programmers. It also covers many of the new features of Outlook 2002, such as the integrated Outlook View Control and searching across multiple folders using SQL syntax and the Search object. · Building block procedures for the most common Outlook programming tasks · Jargon-free language and practical examples to make the material more accessible to new Outlook programmers · Coverage of Outlook Email Security Update · Coverage of the Office XP Web Services Toolkit

Fingerprints and Other Ridge Skin Impressions

Alternately poignant, uplifting, and laugh-out-loud funny, this is an enchanting tale of love, self-forgiveness, and the joyous discovery that it's never too late to become what you were meant to be. Stranded in Adelaide, South Australia, after the death of her former employer, Englishwoman Amanda Davenport is compelled by her rapidly dwindling resources to accept a position as governess on a sheep station in the wilds of the Australian outback. Frightened by the raw desolation she discovers there, Amanda is desperate to earn her passage home to England. Yet against her will, she finds herself irresistibly drawn to both the strange, haunting land and to the easy smile and rugged sensuality of the down-to-earth man who has made it his home. Struggling to bring up three irrepressible, motherless children on an isolated station plagued by all the hardships and dangers of the Flinders Ranges in the 1860s, Patrick O'Reilly thinks the last thing he needs in his life is a prim and proper English gentlewoman. But it isn't long before O'Reilly begins to suspect that Miss Davenport is not exactly what she seems. . . . Rich with the memorable characters and flawless sense of time and place for which Candice Proctor is acclaimed, SEPTEMBER MOON is a heartwarming story of resilience and passion set against the harshly beautiful and untamed landscape of the Australian outback." . . . a consummate storyteller." -Publishers Weekly" . . . one of the best romance writers in the business today!" -The Literary Times From the original 1999 Random House edition: In this, her third novel, the multitalented author of NIGHT IN EDEN returns to the glorious setting of nineteenth-century Australia, to the ancient, primal vistas of the outback, to a land as untamed as a man's soul. . . . Patrick O'Reilly loves life in the wilderness. All he needs is his land, his work, and the company of the children he adores. The last thing he wants is the prim and proper Englishwoman

who arrives to care for his unruly children. Amanda Davenport seems unprepared for the harshness of the place O'Reilly calls home, and yet he finds himself drawn to this proud woman and the fire he knows exists beneath her refined exterior. Accepting a job as governess is the only way Amanda can earn passage back to her beloved England and away from this country she hates—rugged, uncivilized, intoxicating, like Patrick O'Reilly himself. Despite her fears, Amanda gradually awakens to the shimmering heat of this wild primitive land, to the children she can't help but love, and to this magnificent man whose raw sensuality dares to expose her own undeniable passion . . .
