When it comes to evaluating a firm, leadership matters. We know that financial outcomes can predict about 50 percent of a firm's market value. Intangibles like strategy, brand, talent, R&D, innovation, risk, and so on account for the rest. But leadership underlies them all. And despite how important we know it is, we've been forced to rely on subjective and unreliable ways to measure its impact—until now. In this landmark book, leadership scholar, author, and consultant Dave Ulrich proposes a "leadership capital index"—a Moody's or Standard and Poor's rating for leadership. Drawing on research from investors and business leaders, and synthesizing the work of dozens of consulting firms and leadership experts, Ulrich analyzes two broad domains, each comprising five factors. The individual domain includes personal qualities, strategic prowess, execution proficiency, interpersonal skills, and fit between the leader's style and the organization's market promises. The organizational domain encompasses a leader's ability to create customer-focused cultures, manage talent, demand accountability, use information to gain competitive advantage, and set up work processes to deal with change. Ulrich details rigorous metrics and methods

for evaluating leaders on each of these factors. The result is a groundbreaking book that will be of vital interest not only to equity and debt investors but also to boards of directors, executive teams, human resource and leadership development professionals, government and ratings agencies—and of course to leaders themselves.

This book provides an overview of the ACCESS program, a mental health program that has been developed and tested as an efficacious treatment for college students with ADHD. This program is at the cutting edge of clinical research, incorporating treatment strategies that allow for dissemination in real world settings in order to effectively assist college students experiencing difficulties in their academic, personal, social, and emotional functioning. As cognitive behavioral approaches have proved to be the most successful psychological treatments to date, the techniques in this volume follow that model in a detailed and nuanced fashion. The authors provide a week by week breakdown of the program, supplemented by handouts and worksheets designed to facilitate better understanding of the areas targeted by the program. Filling a notable gap in research addressing the ADHD college student population, CBT for College Students with ADHD is a crucial resource for campus mental health practitioners as well as a broad range of clinicians dealing with emerging adults.

The novel *The Island of the Elyms* is set in a village of Sicily. It touches four generations of a well-to-do family and relates the tragic and humorous occurrences in the life of each member of that family. The story is narrated by a young girl, Marianna, whose romantic ideals and openness are often in conflict with the secretive and reserved nature of her family. Marianna loves the more salubrious and rustic lifestyle of the land-workers as opposed to the refined and sophisticated lifestyle of her aristocratic family. She feels the former to be an honest way of life and the latter a pretentious and artificial one. Marianna, with the exuberance of youth, would like to see a radical change in the way her family deals with certain issues. She herself represents a slowly changing society. However, the people whose beliefs have been forged and impressed into their very soul by generations of tumultuous historical events, are resistant to change. Eventually, Marianna learns to appreciate the island's cultural richness and its paradox. A sense of history and mythology, superstition and religion, in fact, often exist alongside one another and are portrayed in the novel. The novel touches also on both the First and Second World Wars because two members of Marianna's family, her grandfather and father, fought in each war respectively. It depicts every human emotion by means of adopting humor and tragedy

throughout. One might say that in the novel *The Island of the Elyms* there is a book within the book as the lives of Marianna's great grandparents and grandparents emerge. The former being read by Nonna from her mother's memoirs and the latter narrated by Nonna herself. When finally Marianna is comfortable with who she is - different from the rest of her family, she is torn away from her birthplace for the great unknown which happens to be Australia. The story ends with the uprooting of the girl by the family, who, in turn, has to forfeit and abandon every dream, and thus becoming the innocent victim of the tragedy of emigration.

Following the publication of *Leadership in Asia: Challenges and Opportunities*, the Singapore Ministry of Manpower convened a Third Executive Roundtable in 2010 to examine the various challenges confronting leadership renewal in the Asian business context, especially in the aftermath of the global financial meltdown and economic downturn of 2009. The intensive session, spread over two days, threw up illuminating examples and astute observations on the subject, which were peppered with thoughtful anecdotes and penetrating truths that will titillate the reader. Involving corporate CEOs, Chief Human Resource Officers and leadership thought leaders, the leadership focus group identified four important questions that Asian leaders must address in order to succeed at the highest level: Where are we going? How do we get there? What is work like when we get there? Who stays and who goes? With these on their minds, they set about to pinpoint eight success factors and action domains that are crucial in leaders to enable them to navigate around the pitfalls of being a leader and a change agent in the organisations they lead. These are: Creating customer-centric actions Implementing strategy Getting past the past Governing through decision making Inspiring

collective meaning making Capitalising on capability Developing careers Generating leaders Edited by eminent leadership gurus Dave Ulrich and Robert Sutton, this book describes the valuable insights and lessons gleaned from individual leaders and the organisations they lead. A useful reference for potential leaders, corporate honchos and management experts on leadership issues in organisations within Asia, it represents a significant contribution to research on the subject in the continent, which is home to a multitude of diverse cultures, languages and beliefs, as well as the unique challenges these pose to leaders in leading their organisations.
