Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S.

automakers are suddenly awash in profits, and South

Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed

production following the 2011 tsunami in Japan.

Shortages of Japanese new cars and supplier

disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer

do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles

rated, with some redesigned models that don't perform as well as previous iterations downrated.

More roof crash-worthiness ratings along with an

expanded cross-border shopping guide. A revised

summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.
