A pregnant young woman becomes obsessed with the disappearance of her lover's wife, only to discover that she may be headed for the same fate, in this novel from New York Times bestselling author Kristin Miller. When secretary Colleen Roper becomes pregnant by her boss, Michael, he whisks her away to Ravenwood, his opulent estate. Abruptly thrust into a life of luxury she's never known, Colleen finds the immense house suffused with the memory of Michael's wife, Joanna, who left months ago and haunts her imagination. With rooms she's prohibited from entering and a staff that greets her with hostility, there is little room for a new mistress of Ravenwood. It's not long before bones are unearthed in the grove across the street and Michael falls under the suspicion of detectives. The soon-to-be mother of his child finds herself hurled deeper into her lover's dark past, a past filled with unfaithfulness and deception. Making a claim to her new life is harder than it seems—especially since she's walking in the shadow of the hauntingly beautiful Joanna. As Colleen untangles truth from lies, she discovers that nothing is what it seems, and that some people will kill to keep their secrets as quiet as the dead. Inspired by Daphne du Maurier's Rebecca, *In Her Shadow* is the chilling story of one woman's desperate desire to be loved and the ghosts that threaten to get in her way.

This book focuses on clean transport and mobility essential to the modern world. It discusses internal combustion engines (ICEs) and alternatives like battery electric vehicles (BEVs) which are growing fast. Alternatives to ICEs start from a very low base and face formidable environmental, material availability, and economic challenges to unlimited and rapid growth. Hence ICEs will continue to be the main power source for transport for decades to come and have to be continuously improved to improve transport

sustainability. The book highlights the need to assess proposed changes in the existing transport system on a life cycle basis. The volume includes chapters discussing the challenges faced by ICEs as well as chapters on novel fuels and fuel/ engine interactions which help in this quest to improve the efficiency of ICE and reduce exhaust pollutants. This book will be of interest to those in academia and industry alike.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, *Lemon-Aid* guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."
