Leyland Motors has a long history dating from 1896, when the Sumner and Spurrier families founded the Lancashire Steam Motor Company in the town of Leyland in North West England. Their first products included steam powered lawn mowers. The company's first vehicle was a 1.5-ton-capacity steam powered van. This was followed by a number of undertype steam wagons using a vertical fire-tube boiler.

The O.680S engine (sometimes referred to as the P.680, P for Power-Plus) was usually set for 200 hp at 2200 rev/min. The transition to the Power-Plus engines took several years. The Power-Plus designation was not used for the buses, other than the PSR1 Lion, and power and torque settings varied quite a bit.

There should be an engine number somewhere, often at the back of the block, left side. The 600 was first produced in 1949 and the 680 shortly after. The main design change came around 1961 when the "power plus" series came in upping the power from 125 to 150bhp in the 600 and from 150 to 200bhp for the 680.

While there's lots on here about Gardners (rightfully so) I can't find much about Leyland engines, and particularly its 0.600 and 0.680. I know both (especially the 0.680) were common in buses and coaches (e.g. Routemaster, Leyland Leopard, Leyland Atlantean/ Daimler Fleetline, Leyland National 2, Bristol RE).
