How to Give Your MGB V8 Power Haynes Publications
Bringing the book directly in line with the amended CIM Business Law syllabus, the book provides marketing students with a thorough working knowledge of the law on contract, sale of goods, agency, as well as the legal mechanisms for resolving commercial disputes, together with coverage of other selected topics which are of importance to marketeers and business in general.
Brooklands Book Limited
"International Product Liability", 2007 edition, with nearly 600 pages, offers contributions from 18 jurisdictions in Australasia, Europe, and North America. Expert practitioners clearly set out the liabilities and obligations of manufacturers, the defenses to and limitations of their liability, and the role of product liability insurance in international trade. The publication is replaced by updated volumes annually. Purchase of print version includes CD version and 24/7 online access. A 10% discount applies to a subscription for next year's update. A 25% discount applies to a subscription for three years of updates. Discounts are applied after purchase by rebate from publisher.
Motor Sport Specialist Marketing International
This book traces the post-war development of gas turbine engines for use in passenger cars and commercial vehicles in the UK, Germany, Italy and the USA. It is based on interviews with leading engineering figures of the day as well as reports by journalists. The work also contains photographs of engines and vehicles as well as diagrams of various gas turbine engines.
America's Textile Reporter History PressLtd
Vols. for 1933-1936 include "The Law journal supplement to the New Zealand law reports."
Bus & Coach Lulu.com
A thorough technical assessment of the Rover V8 engine and all methods of tuning for increased power output. Filled with the V8s transatlantic origins and production,

its competition career in rallies and in saloon car road racing, plus details of all Rover V8 speed equipment suppliers and professional engine builders. This volume brings the Rover V8 story up-to-date with developments ranging from the factory 3.9 litre, to the Range Rover of 1994.

When the AEC Mandator V8 was introduced in 1968 it carried with it high hopes for the future of AEC and the Leyland Group. Nothing remotely like it had been produced before. Word soon got around about its excellent performance. However, just as word had spread about the initial performance of the model, so news soon travelled about the problems arising in service. Eventually the lorry was withdrawn from sale. Since the early 1970s when most of the 300 or so Mandator V8s sold in the UK had been withdrawn, there has always been a strong undercurrent of interest shown in it. AEC Mandator V8 has been out of print for many years, and has been brought back in 2016 to make this fascinating story available again to AEC enthusiasts and those with an interest in general transport history. Graham Edge is a trucking journalist and author. (Series: Commercial Vehicles Archive Series) [Subject: Commercial Vehicles, Transportation]

The New Zealand Law Reports

Compiled for aspiring car creators everywhere, H-Point 2nd Edition provides a unique and comprehensive introduction to advanced vehicle packaging and design. Written and illustrated by Stuart Macey with Geoff Wardle, this book demystifies the automotive design process and allows designers access to illustrious careers' worth of knowledge. Stuart currently works as a studio engineer for a major auto manufacturer in Southern California and teaches vehicle architecture part time at Art Center College of Design. Geoff is Director of Advanced Mobilty at Art Center College of Design.

Leyland P76

No one contemplating an MGB V8 engine conversion should start the project without reading this book, which is based on the real world experience of many owners and specialists who have re-engined MGBs in the past. Avoid expensive mistakes and pitfalls and end up with a car that performs, handle and brakes superbly by following the detailed advice compiled over many years by MGB expert, Roger Williams.

Board and Council

Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder,

cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for Yachting Monthly and many other magazines worldwide, as well as the bestselling Boatowner's Practical and Technical Cruising Manual and Boatowner's Mechanical and Electrical Manual, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

Ward's Auto World

In 1913 an ambitious young businessman named William Morris converted a derelict military college on the outskirts of Oxford into an assembly hall for motor vehicles. He thus opened the first chapter in one of the most extraordinary success stories of the British motor industry, becoming Lord Nuffield and a multi-millionaire in the process. From Morris Motors and Pressed Steel, via the British Motor Corporation and British Leyland to its role as part of BMW and their successful manufacture of the new Mini, car manufacture at Cowley has been a significant player. Though the old factory chimneys have given way to more modern developments, Oxford today would be a very different place without its influence. Most of the photographic material in this book is taken from the comprehensive archive collections of the British Motor Industry Heritage Trust, located at the Heritage Motor Centre, Gaydon. Now in this revised and fully updated edition, new illustrations and text seek to show further how important Morris was to Cowley.
