This book describes
the latest advances,
innovations and
applications in the

field of waste management and environmental geomechanics as presented by leading researchers, engineers and practitioners at the International Conference on Sustainable Waste Management through Design (IC_SWMD), held in Ludhiana (Punjab), India on November 2-3, 2018. Providing a unique overview of new directions, and opportunities for sustainable and resilient design approaches to protect infrastructure and the environment, it discusses diverse topics related to civil engineering and construction aspects of the resource management cycle, from the minimization of waste, through the eco-friendly re-use and processing of waste materials, the management and disposal of residual wastes, to water treatments and technologies. It also encompasses strategies for reducing construction waste through better design, improved recovery, re-use, more efficient resource management and the performance of materials recovered from wastes. The contributions were selected by means of a rigorous peer-review process and highlight many exciting ideas that will spur novel

This book is a

comprehensive guide to
contrast-enhanced
mammography (CEM),
a novel advanced
mammography
technique using dual-
energy mammography
in combination with
intravenous contrast
administration in order
to increase the
diagnostic performance
of digital
mammography. Readers
will find helpful
information on the
principles of CEM and
indications for the
technique. Detailed
attention is devoted to
image interpretation,
with presentation of
case examples and
highlighting of pitfalls
and artifacts. Other
topics to be addressed
include the
establishment of a CEM

program, the comparative merits of CEM and MRI, and the roles of CEM in screening populations and monitoring of response to neoadjuvant chemotherapy. CEM became commercially available in 2011 and is increasingly being used in clinical practice owing to its superiority over full-field digital mammography. This book will be an ideal source of knowledge and guidance for all who wish to start using the technique or to learn more about it.
