In Plain Sight Quercus

A major source for the BBC drama *The Reckoning* Winner of the 2015 Gordon Burn Prize and the 2015 CWA Non-Fiction Dagger Shortlisted for the Orwell Prize and the James Tait Black Prize Dan Davies has spent more than a decade on a quest to find the real Jimmy Savile, and interviewed him extensively over a period of seven years before his death. In the course of his quest, he spent days and nights at a time quizzing Savile at his homes in Leeds and Scarborough, lunched with him at venues ranging from humble transport cafes to the Athenaeum club in London and, most memorably, joined him for a short cruise aboard the QE2. Dan thought his quest had come to an end in October 2011 when Savile's golden coffin was lowered into a grave dug at a 45-degree angle in a Scarborough cemetery. He was wrong. In the last two and a half years, Dan has been interviewing scores of people, many of them unobtainable while Jimmy was alive. What he has discovered was that his instincts were right all along and behind the mask lay a hideous truth. Jimmy Savile was not only complex, damaged and controlling, but cynical, calculating and predatory. He revelled in his status as a Pied Piper of youth and used his power to abuse the vulnerable and underage, all the while covering his tracks by moving into the innermost circles of the establishment.

The Canadian Antiquarian and Numismatic Journal

This reference work provides a wealth of information regarding medicinal plants and phytochemicals. It is addressed both to researchers and teachers. The handbook describes phytochemicals, which, by the strictest definition, are chemicals that are produced by plants. During the last decades, more and more groups became actively involved in exploring plants for useful metabolites that lead to the identification of several useful curative agents and many promising molecules to fight and/or prevent diseases, including carcinogenesis and stroke. But when we talk about phytochemicals, there are also medicinal plants where not a single molecule is responsible for the observed properties. This reference work therefore reviews and compiles the information on both these aspects. The volumes contain contributions on phytochemicals and herbal extracts. A large number of natural products obtained from plants and microorganisms is used in cosmetic, drug, flavor and fragrance industries. For this compilation, a range of the most important medicinal herbs and phytochemicals were selected and are described by the recognized authors in the field. The present reference work encompasses the information about well established phytochemicals, biology and biotechnology of medicinal plants or their products, their biosynthesis, novel production strategies, demand and uses, metabolism and bioavailability. There is a surge of information published in recent years on herbal medicine and their pharmacologic effects with single books available on varied subjects. However, all this information is widespread and difficult to overview. Researchers who wish to keep a pace with the rapidly developing field of natural products can now consult this newly compiled handbook to find all information about bioactive molecules and medicinal plants thoroughly compiled in one place!

Farrago's Wainscot is a quarterly online zine that collects the weird and sublime in fiction and poetry. Words cannot be arranged in too strange a fashion for Old Man Farrago, and FWA 1 is the collected assortment of stories from the first year of the Wainscot's revival. Brand new! Fantastically fresh! With dogs in sweaters! Maybe not that last part, but everything else in the previous paragraph is true in the most literary weird sense possible, because that's what one comes to expect with the Wainscot.
