Audio and video content is all around us. And these days much of it comes not from TV cables, satellite dishes, and radio antennas, but from our digital devices around the house, streaming over the Internet and local networks. And that's why we created the Digital Entertainment Superguide, a primer with everything you need to know to get started. This book walks you through how to set up your home network and choose the right hardware—set-top boxes, smart TVs, media center computers, streaming speakers, remote controls, and more—for your needs. Like to watch TV shows and movies but not sure where to find what? We've got you covered with a guide to streaming video sources for your TV or mobile devices. We don't leave music lovers out either, as we help you choose the best streaming audio service. Do you want Mog, Rdio, Rhapsody, Slacker, or Spotify? How much does each service cost? Which sounds best? We answer all those questions and more in the pages that follow. Finally, if you're wondering how to move audio and video around the house—stream music wirelessly from an iPhone to an AirPlay speaker in the living room or send video from a computer to your beautiful wall-mounted HDTV—you've come to the right place. We'll even show you how to use your smartphone or tablet to control it all. So read on, and let the fun begin!

Maximum PC Plunkett Research, Ltd.

The cell phone is the fastest-selling consumer electronic in the world. On a global basis, over 800 million cellular telephones are sold yearly. More camera-equipped cell phones are sold each year than stand alone digital cameras. Rapid development of new technologies is leading to ever more versatile, multipurpose mobile devices, including 3G Internet-enabled cell phones and PDAs. Meanwhile, wireless networking and wireless Internet access are developing and expanding on a global basis at a rapid rate. Booming technologies include such 802.11 standards as Wi-Fi and WiMax, as well as Ultra Wide Band (UWB) and Bluetooth. Telematics, intelligent transportation systems (ITS) and satellite radio will soon create an entertainment, navigation and communications revolution within automobiles and trucks. Meanwhile, RFID (radio frequency identification) will revolutionize wireless tracking, inventory and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers and managers. Plunkett's Wireless, Wi-Fi, RFID & Cellular Industry Almanac 2008 covers such sectors. Our coverage includes business trends analysis and industry statistics. We also include a wireless and cellular business glossary and a listing of industry contacts, such as industry associations and government agencies. Next, we profile hundreds of leading companies. Our 350 company profiles include complete business descriptions and up to 27 executives by name and title.

BOAS IDEIAS PARA INSPIRAR SEUS PROJETOS - Saiu a edição 2021 do Anuário Home Theater Best, com as tendências em tecnologia e design de interiores. "Home Theater Best" é um anuário produzido há mais de 20 anos pela equipe da revista HOME THEATER & CASA DIGITAL, e que traz um panorama do mercado brasileiro. Ali estão projetos em casas e apartamentos que a equipe visitou em todo o país ao longo do ano, com comentários, fotos e detalhes técnicos explicativos. Lançado em 2000, o anuário se tornou referência obrigatória para profissionais do segmento, e também para os consumidores. Na descrição dos projetos, o leitor encontra dezenas de ideias e novas soluções que combinam decoração com home theater e automação. Da montagem de um mini cinema em casa à sonorização de todos os ambientes, incluindo cozinhas, suítes, varandas e jardins, Home Theater Best é uma excelente fonte de consulta para quem vai começar o seu projeto.
