Vikas Publishing House

Chinese enterprises have relied on importing technology and imitation as their main technology strategies in the past. Based on analysis of cross-countries' case studies and the history of industrial innovation, the authors proposed the concept of industry-driven basic research and expounds the important role of scientific discovery in industrial

technological innovation. They are convinced that both the government and enterprises should focus on industry-driven basic research in order to bridge the gap between the government's target and what enterprises actually do in China. The challenge remains to be seen if China can transform Science and technology investment into real industrial innovation capability.

Buying Guide 2007 Canadian Edition World Scientific

This book deals with the various ways Netflix reconceptualises television as part of the process of TV IV. As television continues to undergo a myriad of significant changes, Netflix has proven itself to be the dominant force in this development, simultaneously driving a number of these changes and challenging television ' s existing institutional structures. This comprehensive study explores the pre-history of Netflix, the role of binge-watching in its organisation and marketing, and Netflix ' s position as a transnational broadcaster. It also examines different concepts of control and the role these play in the history of ancillary technologies, from the remote control to binge-watching as Netflix ' s iteration of giving control to the viewers. By focusing on Netflix ' s relationship with the linear television schedule, its

negotiations of quality and marketing, as well as the way Netflix integrates into national media systems, Netflix and the Re-invention of Television illuminates the importance of Netflix's role within the processes of TV IV. The Independent Guide to IBM-standard Personal Computing Graphic Communications Group Marketing is a way of doing business. It is all pervasive, a part of everyone's job description. Marketing is an expression of a company's character, and is a responsibility that necessarily belongs to the whole company and everyone in it. The Complete Idiot's Guide to Search Engine Optimization The Screen Media ReaderCulture, Theory, Practice Kemel Mellahi's name appears as first author in 2011 edition. PC Magazine Entrepreneur Press During the antebellum period, slave owners weaponized southern Black joy to argue for enslavement, propagating images of "happy darkies." In contrast, abolitionists wielded sorrow by emphasizing racial oppression. Both arguments were so

effective that a political uneasiness on the subject still lingers. In *The Politics of Black Joy*, Lindsey Stewart wades into these uncomfortable waters by analyzing Zora Neale Hurston's uses of the concept of Black southern joy. Stewart develops Hurston's contributions to political theory and philosophy of race by introducing the politics of joy as a refusal of neo-abolitionism, a political tradition that reduces southern Black life to tragedy or social death. To develop the politics of joy, Stewart draws upon Zora Neale Hurston's essays, Beyoncé's *Lemonade*, and figures across several disciplines including Frederick Douglass, W. E. B. Du Bois, Toni Morrison, Angela Davis, Saidiya Hartman, Imani Perry, Eddie Glaude, and Audra Simpson. The politics of joy offers insights that are crucial for forming needed new paths in our current moment. For those interested in examining popular conceptions of Black political agency at the intersection of geography, gender, class, and Black spirituality, *The Politics of Black Joy* is essential reading.

In today's world, 'change' is the only 'constant' factor. In the last few decades, there has been a radical change in how organizations function. To survive in this highly volatile environment, companies need a long-term strategic vision and thinking. In light of this, 'strategic management' has become a significant topic and is taught as the core subject in MBA/PGDM programmes in Indian universities and business schools. This is a book written in the context of the Indian business environment but with a global orientation. It is comprehensive and contemporary in its approach.
