Psychosocial Rehabilitation is a comprehensive ready-reference for mental health practitioners and students, providing practical advice on the full range of interventions for psychosocial rehabilitation. It contextualises the interventions described and provides pointers to enable the reader to explore the theory and research. This manual recognises the wide-ranging impact of mental illness and its ramifications on daily life, and promotes a recovery model of psychosocial rehabilitation and aims to empower clinicians to engage their clients in tailored rehabilitation plans. The book is divided into five key sections. Section 1 looks at assessment covering tools available in the public domain, instruments, scoring systems, norms and applications for diagnosis and measurement of

symptoms, cognitive functioning, impairment and recovery. Section 2 covers the full range of therapeutic interventions and offers advice on training and supervision requirements and evaluation of process, impact and outcome. Section 3 provides manuals and programs for intervention effectively provided as group activities. Section 4 explains how to design a full programme that integrates therapeutic interventions with group programmes as well as services provided by other agencies. The final section looks at peer support and self help, providing manuals and resources that support programmes and interventions not requiring professional or practitioner direction.

Veterinary Clinical Pathology: A Case-Based Approach presents 200 cases

with questions for those interested in improving their skills in veterinary clinical pathology. It emphasises an understanding of basic pathophysiologic mechanisms of disease, differential diagnoses and recognition of patterns associated with various diseases or conditions. Topics discussed include haematology, clinical chemistry, endocrinology, acid-base and blood gas analysis, haemostasis, urinalysis, biological variation and quality control. Species covered include the cat, dog and horse, with additional material on ruminants. Cases vary in difficulty, allowing beginners to improve their clinicopathologic skills while more complicated cases, or cases treating unfamiliar topics, are included for experienced readers. This book is a helpful revision aid for those in training as well as for those in practice who are pursuing continuing education. It is also a valuable resource for veterinary nurses and technicians.

Seventy per cent of newly qualified secondary teachers say that they are well-prepared for certain

aspects of teaching their specialist subject - such as planning, selecting resources and assessing their own teaching - and yet feel very much less prepared in other professional areas. This second edition tackles all the issues that new teachers find difficult. It builds on the skills and knowledge they will have learned on their initial teacher education or PGCE course and offers a planned process of professional development and includes chapters on: managing yourself and your workload working as part of a team developing teaching and learning strategies challenging behaviour in the classroom assessing, recording and reporting values and Citizenship Education the school sixth form and the growth of vocational qualifications continuing professional development. The book can be used either as a stand alone companion for newly qualified teachers, or as a follow-on from the editors' successful text book, *Learning to Teach in the Secondary School*, also published by Routledge.

Rehabilitation should not stop when the disabled person is discharged from hospital, and many neurological patients require ongoing rehabilitation in order to maximize their functional abilities, minimize complications and promote full participation at home and in the community. This book analyses community

rehabilitation needs from many different perspectives, including the views of disabled people, rehabilitation clinicians and service providers. Many examples of community rehabilitation schemes are presented, with evidence for their effectiveness, and case studies are used to highlight the main issues. The authors take an international view, and there are chapters dealing with the disabled child in the community and with neuropsychological rehabilitation. This important book examines the growing trend towards community rehabilitation in neurology and is directed towards all clinicians involved with neurorehabilitation.

This is the second book in The
Great Mental Models series and
the highly anticipated follow
up to the Wall Street Journal
best seller, Volume 1: General
Thinking Concepts. We tend to
isolate the things we know in

the domain we learned it. For
example: What does the inertia
of a rolling stone have to do
with perseverance and being
open minded? How can the
ancient process of steel
production make you a more
creative and innovative
thinker? What does the
replication of our skin cells
have to do with being a
stronger and more effective
leader? On the surface, these
concepts may appear to be
dissimilar and unrelated. But
the surprising truth is the
hard sciences (physics,
chemistry, and biology) offer a
wealth of useful tools you can
use to develop critically
important skills like: *
Relationship building *
Leadership * Communication *
Creativity * Curiosity *
Problem solving * Decision-
making This second volume of
the Great Mental Models series
shows you how to make those
connections. It explores the
core ideas from the hard

sciences and offers nearly two
dozen models to add to your
mental toolbox. You'll not only
get a better understanding of
the forces that influence the
world around you, but you'll
learn how to direct those
forces to create outsized
advantages in the areas of your
life that matter most to you.

Oblomov, novel by Russian writer Ivan Goncharov, published in 1859. The work is a powerful critique of 19th-century Russia, contrasting aristocrats with the merchant class and condemning the feudal system. Its hero, Oblomov, is a generous but indecisive young nobleman who loses the woman he loves to a vigorous, pragmatic friend. A perpetual daydreamer, he lives his life in his mind and spends his time in bed. From this character derives the Russian term *oblomovshchina*, epitomizing the backwardness, inertia, and futility of 19th-century Russian society.
