A widow in her mid-thirties, Alison has been in mourning for two years. She lives in West Virginia with her sister and brother-in-law, and they are urging her to get on with her life and move back home. Alison promises to leave-just as soon as she renovates a nearly ruined 1976 Corvette rusting in their garage. Problem is, she doesn't know the first thing about cars, and the townspeople are

reluctant to have a woman messing with automotive parts.

perspective an era when "Turn on, Burn down, Blow up" are revolutionary slogans of the day. Says the author "This book... is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There i detailed advice concerning electronics, sabotage, and surveillance, with

data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.
