International Film Guide  
Simon and Schuster  
The main function of western musical notation is incidental: it prescribes and records sound. But during the fourteenth and fifteenth centuries, notation began to take on an aesthetic life all its own. In the early fifteenth century, a musician might be asked to sing a line slower, faster, or starting on a different pitch than what is written. By the end of the century composers had begun tasking singers with solving elaborate puzzles to produce sounds

whose relationship to the written notes is anything but obvious. These instructions, which appear by turns unnecessary and confounding, challenge traditional conceptions of music writing that understand notation as an incidental consequence of the desire to record sound. This book explores innovations in late-medieval music writing as well as how modern scholarship on notation has informed sometimes erroneously ideas about the premodern era. Drawing on both musical and music-theoretical evidence, this book

reframes our understanding of late-medieval musical notation as a system that was innovative, cutting-edge, and dynamic one that could be used to generate music, not just preserve it.

This is the story of how Diane Struble came to be the first person to swim the length of Lake

George in 1958, thrilling thousands, in an event that many call unforgettable, told from her daughter, Gwenne Rippon's perspective. It is a story of how a determined, disciplined, tough and talented woman made herself into a world class athlete--at a time when women were not often recognized as such--and passed her values on to her children and taught them to be strong. The timelessness of Diane Struble's story highlights how important Lake George is to so many as a pure and natural body of water. The book is set against the backdrop of the need to preserve pristine waters.

Engaging Art explores what it

means to participate in the arts in contemporary society – from museum attendance to music downloading. Drawing on the perspectives of experts from diverse fields (including Princeton scholars Robert Wuthnow and Paul DiMaggio; Barry Schwartz, author of *The Paradox of Choice*; and MIT scholars Henry Jenkins and Mark Schuster), this volume analyzes key trends involving technology, audience demographics, religion, and the rise of "do-it-yourself" participatory culture. Commissioned by The Wallace Foundation and independently carried out by the Curb Center at Vanderbilt University, Engaging Art offers a new framework for

---

understanding the momentous changes impacting America's cultural life over the past fifty years. This volume offers suggestive glimpses into the character and consequence of a new engagement with old-fashioned participation in the arts. The authors in this volume hint at a bright future for art and citizen art making. They argue that if we center a new commitment to arts participation in everyday art making, creativity, and quality of life, we will not only restore the lifelong pleasure of homemade art, but will likely seed a new generation of enthusiasts who will support America's signature nonprofit cultural institutions well into the future.

Where Sight Meets Sound  
LG Electronics launched its brand in the late 1950s and became a household name for electronics and appliances. As the company grew, so did its range of products and services. LG Electronics has now become renowned mobile technology. The company offers a range of LG smart phones; the latest of which include the LG V30. This new smart phone is scheduled to be released to the public in November of 2017. Since being

announced, reviews on the new device have been overwhelmingly positive. The device has been lauded for its plethora of modern and innovative features as well as its appeal to a wider cross-section of the target market. Among the features that users will be able to enjoy is the 6 inch display outfitted with OLED FullVision, a 2.45 gigahertz processor, a 5 megapixel front facing camera and a 16 megapixel rear facing camera with outstanding resolution of 4656 by 3492 and LED flash.

Thoughttrave is the immediate and most detailed archive of Lady Gaga's emotional, intellectual, philosophical, and spiritual evolution, a reclaiming of her art (and humanity) from within the center of her celebrity during one of the most difficult transitions of her career: Summer 2013-Fall 2014. Lady Gaga: I don't like being used to make money. I feel sad when I am overworked and that I just become a money making machine and that my passion and my creativity take a backseat. That makes me unhappy. So, what did I do? I started to say no. Not doing that. I don't want to do that. I'm not taking that picture. Not going to

---

that event. Not standing by that because that's not what I stand for. Thoughtrave marks perhaps the most important (and unconditional, unpublished, unencumbered) insights into the music industry, the personal battles that accompanied her transition from Stefani to Gaga. "It's one of those rare moments in life when you ask a question of someone you've admired for many years and receive the most honest of answers leading both people into a relationship that was and remains one of the most important of my life," says Baum, a professor, producer, composer, writer, editor, and activist for adjunct professors. As Baum explains to Stefani in one of the

many interviews published here for the first time, Robert Craig Baum: It's uncanny for me to look back at 2008-2011 - when I was intensely meditating on the problem "Why is there any being at all?" - to find evidence of your intervention here with me...to find you, back then...before I knew you. It was almost as if I was playing the Bruce Willis character in Twelve Monkeys, overshooting my mark in time/space, aiming for this particular conversation but speaking through Ereignis (life gives) to a moment I (and many others) call "headphones on." As George Elerick writes in his Introduction to the book, "In Hand-to-Hand Battle for the Users," "The book you hold in

your hands easily falls into the category of a transgression. It's as though we are breaking into somewhere we are not meant to be (like a rave) and are invited into the mind of one of today's musical geniuses. Maybe we can even equivocate the experience to that of being a member of the paparazzi. Their whole mode of employment is based on breaking social codes and entering into the lives of everyday-people-turned-rock-stars. That's what this book is, a disruptive invitation to break into the life and mind of Lady Gaga, the person, not just the persona."
