Fourth Generation Mobile Communication MicroStrategy, Inc. Wireless power transmission is the final step in making mobile smartphones truly mobile by substituting the charging cords that restrain these devices at the moment. Introduced by Nikola Tesla towards the end of the 19th century, this technology is envisioned to solve the energy crisis in future by transmitting solar energy harvested in the outer space. The technology has the potential to revolutionize the automobile and aviation industry by allowing wireless charging of vehicles on the go. This technology

can ' t be neglected anymore, owing to the tremendous impact that it can impart by redefining industries (Energy, Automobile, Consumer electronics, and many more). In this report, we study the technological landscape of this technology from the perspective of Intellectual Property (Patents).
