Rose is a princess, a Cinder, and half-human. She is the last one born of her kind, and on her twenty-first birthday, she must enter the woods and travel to find her Prince, as her sisters did before her. "... And we will all dance at the Grand Ball," her sisters would always say. But the Human servants are keeping a secret that could prevent the Cinders from reaching their Happily Ever After....Hidden in Rose's dreams and vision are the answers of the past between Cinders and Humans, and she is quickly running out of time trying to solve their hidden messages. She knows the answer lies in her first clue--identifying an animal she has never seen before--that persistent vision of a furry white animal, holding a gold metal object and exclaiming, "Oh dear! Oh dear! I shall be too late!"

Nearest-neighbor Methods in Learning and Vision The Floating Press
Settle in for a titillating tale of illicit passion, romantic entanglement, and murder. Honore de Balzac's novella *The Girl With the Golden Eyes* highlights the French writer's skillful ability to convey truths about the darker nature of humanity through perfectly wrought details and observations. A must-read for fans of classic European literature, or for readers who love a healthy dose of psychological complexity with their mysteries.

Little Ida liked the student, who always had a tale to tell, a lot. So, one morning, when little Ida's flowers had all withered, she asked the student what could have happened to them. Hans Christian Andersen (1805-1875) was a Danish author, poet and artist. Celebrated for children's literature, his most cherished fairy tales include "The Emperor's New Clothes", "The Little Mermaid", "The Nightingale", "The Steadfast Tin Soldier", "The Snow Queen", "The Ugly Duckling" and "The Little Match Girl". His books have been translated into every living language, and today there is no child or adult that has not met Andersen's whimsical characters. His fairy tales have been adapted to stage and screen countless times, most notably by Disney with the animated films "The Little Mermaid" in 1989 and "Frozen", which is loosely based on "The Snow Queen", in 2013. Thanks to Andersen's contribution to children's literature, his birth date, April 2, is celebrated as International Children's Book Day.

** NOTE ** While this edition is good value, there is a newer edition: The (Unofficial) Google Nexus 5 SmartPhone Book - Second Edition, The Google-designed and LG-manufactured Nexus 5 is the first smartphone to run the Android 4.4 "KitKat" operating system. If you've just bought a Nexus 5 smartphone, or you're thinking about buying one, you should read this book. The ethos of the book is very much "What the Nexus 5 can do for you!", and it's an unofficial book because we have not colluded with the manufacturers (Google or LG) during the writing of the book...so we can say pretty much whatever we want. And if we say we like it, it's because we really do. But we're no "fan-boys", and we don't mind giving a warts 'n' all coverage where it's warranted. So whether you're so-far undecided, or have already purchased your Nexus 5...buy this book! Herein are 17 illustrated stories by Robert Gordon Anderson with 16 full-page colour illustrations by Dorothy Hope Smith. This volume is the sequel to *The Seven O'Clock Stories* also written by Robert Gordon Anderson and with the same three happy children and are short stories of everyday happenings on a farm. The story of the Big Bobsled, even contains instructions on how to make your own. The volume is introduced with "The Top Of The Morning" which is the saying the Toymaker uses as a greeting, no matter the weather which sets the tone of the book. The stories are: "The Top Of The Morning" I The Little Lost Fox II The Big Bobsled III The Jolly Roger IV The Blue Croaker, The Bright Agate, And The Little Gray Mig V The Old Woman Who Lived On The Canal VI Two O' Cat VII The Fairy Lamp VIII The Animals' Birthday Party IX Dr. Philemon Pipp, The Patient Medicine Man X When Jehosophat Forgot His Piece XI Ole Man Pumpkin XII The Norway Spruce XIII When The Door Opened XIV The Hole That Ran To China XV The Peppermint Pagoda XVI He That Took The City These stories are simply and naturally told and are for children aged five to nine years old. As with all children's stories, they have originated in a place where good wishes come true: where the poor and the lonely are rich and live in castles and have friends: and where sorrowful folk are happy. Here you will hear the birds singing and children laughing, all day long. The trees are full of blossoms and fruit. The sky is always blue, the grass green and soft. Under the trees dwell the fairies, and against the blue sky you will sometimes see the sheen of angels' wings as the flit by. We invite you to curl up with this unique sliver of Fairy culture not seen in print for over a century; and immerse yourself in the tales and fables of yesteryear. 10% of the net sale will be donated to charities by the publisher.

I have lived much that I have not written, but I have written nothing that I have not lived, and the story of this book is but a plaintive refrain wrung from the over-burdened song of my life; while the tides of feeling, winding down the lines, had their sources in as many broken upheavals of my own heart." A book, like an implement, must be judged by its adaptation to its special design, however unfit for any other end. This volume is designed to help Odd-Fellows in their search for the good things in life. There is need of something to break the spell of indifference that oftentimes binds us, and to open glimpses of better, sweeter, grander possibilities. Hence this volume, which is a plea for that great fortune of man--his own nature. Bulwer says: "Strive while improving your one talent to enrich your whole capital as a man." The present work is designed to aid in securing the result thus recommended. We send it forth, trusting that it will find its way into the hands of every Odd-Fellow and every Odd-Fellow's friend and neighbor, and that those who read it will gather from its pages lessons which shall enable them to pluck thorns from their pathway and scatter flowers instead.

Embedded system, as a subject, is an amalgamation of different domains, such as digital design, architecture, operating systems, interfaces, and algorithmic optimization techniques. This book acquaints the students with the alternatives and intricacies of embedded system design. It is designed as a textbook for the undergraduate students of Electronics and Communication Engineering, Electronics and Instrumentation Engineering, Computer Science and Engineering, Information Communication Technology (ICT), as well as for the postgraduate students of Computer Applications (MCA). While in the hardware platform the book explains the role of microcontrollers and introduces one of the most widely used embedded processors, ARM; it also deliberates on other alternatives, DSP, FPD and IC. It provides a good overview of the interfacing standards covering RS232C, RS422, RS485, USB, IrDA, Bluetooth, and CAN. In the software domain, the book introduces the features of real-time operating systems for use in embedded applications. Various scheduling algorithms have been discussed with their merits and demerits. The existing real-time operating systems have been surveyed. Guided by cost and performance requirements, embedded applications are often implemented partly in hardware and partly in software. This book covers the different optimization techniques proposed in the literature to take a judicious decision about this partitioning of application tasks. Power-aware design of embedded systems has also been dealt with. KEY FEATURES • Presents a considerably wide range of the field of embedded systems • Discusses the ARM microcontroller in detail • Enumerates various sensors and actuators used in embedded system design • Provides numerous exercises to assess the learning process • Offers a good discussion on hardware-software codesign • Provides a detailed study on security aspects of embedded systems NEW TO THE EDITION The new edition introduces: • Two new chapters—Sensors and Actuators, and Security in Embedded Systems. • Various security issues with a case study on the security in Smart Cards. • Design challenges of a secure embedded system. • Different types of security attacks and their probable prevention strategies. TARGET AUDIENCE • B.E./B.Tech (EE/ECE/EIE/CSICT) • M.E./M.Tech (EE/ECE/EIE/CSICT) • MCA

Heart of Darkness, and the Critics

Three beautifully illustrated classic Polish tales that will enchant the young readers of today In the late 1930s renowned Polish poet Julian Tuwim, was asked to write three poems for children. The publisher Przeworski connected the three poems into one book, *Locomotive*, and commissioned illustrations from celebrated Polish illustration duo Lewitt and Him. *Locomotive* was the beginning of a creative partnership that lasted many years. Featuring the original three poems, *Locomotive*, *The Turnip*, and *The Bird's Broadcast*, children learn what's inside each train carriage as it chugs along, how many people, animals, and friends it takes to pull a turnip from the ground, and what happens when birds of all kinds gather for a meeting in the woods. After its original publication in 1939 in Polish, *Locomotive* was swiftly translated into French and English the next year, appearing at a time when it would have been a surprise and a joy to encounter bright colors and modernist- inflected imagery. Both classic and modern, its imaginative storytelling and appeal has endured and will delight children today as much as it did eighty years ago.

Little Ida's Flowers

In this 2012 edition of *Advances in Knowledge-Based and Intelligent Information and Engineering Systems* the latest innovations and advances in Intelligent Systems and related areas are presented by leading experts from all over the world. The 228 papers that are included cover a wide range of topics. One emphasis is on Information Processing, which has become a pervasive phenomenon in our civilization. While the majority

of Information Processing is becoming intelligent in a very broad sense, major research in Semantics, Artificial Intelligence and Knowledge Engineering supports the domain specific applications that are becoming more and more present in our everyday living. Ontologies play a major role in the development of Knowledge Engineering in various domains, from Semantic Web down to the design of specific Decision Support Systems. Research on Ontologies and their applications is a highly active front of current Computational Intelligence science that is addressed here. Other subjects in this volume are modern Machine Learning, Lattice Computing and Mathematical Morphology. The wide scope and high quality of these contributions clearly show that knowledge engineering is a continuous living and evolving set of technologies aimed at improving the design and understanding of systems and their relations with humans.
