ERDA Research Abstracts Springer Science & Business Media

The essays in this collection explore taboo and controversial humour in traditional scripted (sitcoms and other comedy series, animated series) and non-scripted forms (stand-up comedy, factual and reality shows, and advertising) both on cable and network television. Whilst the focus is predominantly on the US and UK, the contributors also address more general and global issues and different contexts of reception, in an attempt to look at this kind of comedy from different perspectives. Over the last few decades, taboo comedy has become a staple of television programming, thus raising issues concerning its functions and appropriateness, and making it an extremely relevant subject for those interested in how both humour and television work.

An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Aquaponics is the integration of aquaculture and soilless culture in a closed production system. This manual details aquaponics for small-scale production--predominantly for home use. It is divided into nine chapters and seven annexes, with each chapter dedicated to an individual module of aquaponics. The target audience for this manual is agriculture extension agents, regional fisheries officers, non-governmental organizations, community organizers, government ministers, companies and singles worldwide. The intention is to bring a general understanding of aquaponics to people who previously may have only known about one aspect.

With the milestones of Digital TV and HDTV, there are lots of questions to be asked about television of today... *Understanding Digital Television* explains complex technical systems and solutions in an easy to comprehend manner along with visual 3D graphics. It helps non-technical individuals such as managers, executives, general media professionals, as well as TV and home cinema enthusiasts gain a practical understanding of the equipment, technical aspects of digital television, and various ways of distributing. Most examples are from a European perspective, but also include comparisons with North American systems. This book answers the confusing questions about new devices and digital formats, what to do when the analog TV transmitters are switched off, watching TV using your

broadband connection, and much more.

Understanding Digital Television

This book deals with the various ways Netflix reconceptualises television as part of the process of TV IV. As television continues to undergo a myriad of significant changes, Netflix has proven itself to be the dominant force in this development, simultaneously driving a number of these changes and challenging television's existing institutional structures. This comprehensive study explores the pre-history of Netflix, the role of binge-watching in its organisation and marketing, and Netflix's position as a transnational broadcaster. It also examines different concepts of control and the role these play in the history of ancillary technologies, from the remote control to binge-watching as Netflix's iteration of giving control to the viewers. By focusing on Netflix's relationship with the linear television schedule, its negotiations of quality and marketing, as well as the way Netflix integrates into national media systems, Netflix and the Re-invention of Television illuminates the importance of Netflix's role within the processes of TV IV.

Boys' Life

This pocket-sized manual serves as a concise and ideal reference work for therapeutic approaches using apheresis, Covering both basic theory and clinical details to facilitate improved treatment and patient outcomes, the text considers a variety of diseases, including myasthenia gravis, multiple sclerosis, Guillain-Barre syndrome, chronic inflammatory demyelinating polyneuropathy, nephrotic syndrome, TTP/TMA, dilated cardiomyopathy, and many other conditions. The books also reviews the growing trend towards adopting this unique therapy for a wide range of health management issues such as morbid obesity and/or type 2 diabetes, and for lowering LDL-cholesterol (cholesterol apheresis) in patients unresponsive to medication or lifestyle modification.
