Les Soeurs Vatar, described by its author as a "lewd but exact" slice of life, was J.-K. Huysmans' second novel. Huysmans abandoned poetry and turned to the novel at a time when the works of Emile Zola were intensely controversial; Les Soeurs Vatar is dedicated to Zola by "his fervent admirer and devoted friend." In it, Huysmans vividly depicts the scene that for his generation of French writers stood for the contemporary world: the brutal, teeming life of the industrial quarters of Paris in the 1870s. Huysmans' Vatar sisters are "D é sir é e, an urchin of fifteen, a brunette with large, pale eyes that were somewhat crossed, plump without being fat, attractive and clean; and C é line, the carouser, a big girl with clear eyes and hair the color of straw, a solid, vigorous girl whose blood raced and danced in her veins." The two are part of that "bizarre race of young women" who work as bookbinders, whose lives revolve around the gaslighted bindery works, the gaudy shop windows, and cheap wineshops that Huysmans describes with minute and colorful detail. His precisely observed sketches show that

Naturalism as practiced by Buysmans had none of Zola's emphasis on "scientific" determinism, but centered primarily on the faithful rendering of what he described as "living persons in real milieus." The Vatar Sisters is the first English translation of Les Soeurs Vatar.

Copyright and the Music Marketplace University Press of Kentucky

Between good intentions and great results lies a program theory not just a list of tasks but a vision of what needs to happen, and how. Now widely used in government and not-for-profit organizations, program theory provides a coherent picture of how change occurs and how to improve performance. Purposeful Program Theory shows how to develop, represent, and use program theory thoughtfully and strategically to suit your particular situation, drawing on the fifty-year history of program theory and the authors' experiences over more than twenty-five years. "From needs assessment to intervention design, from implementation to outcomes evaluation, from policy formulation to policy execution and evaluation, program theory is paramount. But until now no book has examined these multiple uses of program theory in a comprehensive, understandable, and integrated way. This promises to be a breakthrough book, valuable to practitioners, program designers, evaluators, policy analysts, funders, and scholars who care about understanding why an intervention works or doesn't work." Michael Quinn Patton, author, Utilization-Focused Evaluation "Finally, the definitive guide to evaluation using program theory! Far from the narrow 'one true way' approaches to program theory, this book provides numerous practical options for applying program theory to fulfill different purposes and constraints, and guides the reader through the sound critical thinking required to select from among the options. The tour de force of the history and use of program theory is a truly global view, with examples from around the world and across the full range of content domains. A must-have for any serious evaluator." E. Jane Davidson, PhD, Real Evaluation Ltd. Companion Web site: josseybass.com/go/funnellrogers

Charles Bonnet, Analytical Essay on the Faculties of the Soul Springer Science & Business Media

Go on the trip of a lifetime.

Two Wheels South shows you how to realize your own journey.

Two friends take the motorcycle trip of their life--From Brooklyn to Patagonia. Matias Corea shares his insights on how to prepare, choose the right motorcycle, what to pack, how to plan the route, where to camp and last but not least:

How to prepare your mind.

Setbacks and breaking down are part of the adventure, but

preparation and being on the road teach you the confidence

to tackle any problem. Follow

Matias Corea and his friend

Joel through the American

South, Central America over the Darien Gap and beyond, over

wooden cracking jungle bridges

in Colombia and to dry lake

high plateaus in Argentina.

Feel the character of the roads and the smell of nature: Riding

a motorcycle is one of the

purest forms of traveling.

After 7 months and 13 countries

Matias and Joel have learned a

lot while riding down south on

their trusty BMW air-cooled G /

S overland haulers and are

ready to share their

experience. Two Wheels South

invites you on the experience

of a lifetime.

Evidence-Based Policy Oxford University Press

The Copyright Office has previously highlighted the outmoded rules for the licensing of musical works and sound recordings as an area in significant need of reform. Moreover, the Office has underscored the need for a comprehensive approach to copyright review and revision generally. This is especially true in the case of music licensing the problems in the music marketplace need to be evaluated as a whole, rather than as isolated or individual concerns of particular stakeholders.

Chemical Data Guide for Bulk Shipment by Water Legare Street Press

"The Treviso Arithmetic, or Arte dell'Abbaco, is an anonymous textbook in commercial arithmetic written in vernacular Venetian and published in Treviso, Italy in 1478. The Treviso Arithmetic is the earliest known printed mathematics book in the West, and one of the first printed European textbooks dealing with a science. The Treviso Arithmetic is a practical book intended for self study and for use in Venetian trade. It is written in vernacular Venetian and communicated knowledge to a large population. It helped to end the monopoly on mathematical knowledge and gave important information to the

middle class. It was not written for a large audience, but was intended to teach mathematics of everyday currency. The Treviso became one of the first mathematics books written for the expansion of human knowledge. It provided an opportunity for the common person, rather than only a privileged few, to learn the art of computation. The Treviso Arithmetic provided an early example of the Hindu-Arabic numeral system computational algorithms."--Wikipedia.

Toxicity and Waste Management Using Bioremediation Kluwer Law International B.V.

All forms of online communications and interactions between people and companies on the Internet are facilitated by intermediaries - service providers whose decisions and policies have a shaping effect on the Internet, its users and the information shared on it. Today, because such intermediaries employ technologies that go well beyond the mere transmission and storage of information into new realms potentially disrupting existing business models, a rethinking of existing relevant law is called for. The legal analysis and recommendations in this book put the topic of intermediary liability in the perspective of copyright law and offer a vision on how to regulate that liability. In the context of in-depth and up-to-date analyses

on EU, US, German and Dutch law, attention to the extent to which the author discusses such issues an intermediary can be held and topics as the following: the liable for copyright liability rules in the new infringements in both the EU and Directive on Copyright in the the US will prove highly Digital Single Market; liability beneficial for in-house for the intermediary's own counsellors and advisors working copyright infringements (primary for rights holder organizations liability); the intermediary's and intermediary service responsibility to stop or providers. prevent the infringements of *Boileau's Lutrin* Createspace others (secondary liability); Independent Publishing Platform the role that fundamental rights "Life makes warriors of us all. play in copyright law and To emerge the victors, we must intermediary liability; the arm ourselves with the most rights and interests of potent of weapons. That weapon copyright owners, intermediaries is prayer." –Rebbe Nachman of and users, and how they are Breslov The "gentle weapon" of protected; notice-and-takedown prayer can ease the soul and by service providers; website strengthen the heart, while blocking by Internet access bringing us closer to God and providers; the publisher's to a deeper understanding of rights and the use of online ourselves. The detailed are what's needed the most.

The Genuine Works of Hippocrates

Oxford University Press, USA

Logic, the discipline that explores valid reasoning, does not need to be limited to a specific form of representation but should include any form as long as it allows us to draw sound conclusions from given information. The use of diagrams has a long but unequal history in logic: The golden age of diagrammatic logic of the 19th century thanks to Euler and Venn diagrams was followed by the early 20th century's symbolization of modern logic by Frege and Russell. Recently, we have been witnessing a revival of interest in diagrams from various disciplines - mathematics, logic, philosophy, cognitive science, and computer science. This book aims to provide a space for this newly debated topic - the logical status of diagrams - in order to advance the goal of universal logic by exploring common and/or unique features of visual reasoning.

Encompassing Amazonian rainforests, Andean peaks, coastal lowlands, and the Galápagos Islands, Ecuador's geography is notably diverse. So too are its history, culture, and politics, all of which are examined from many perspectives in The Ecuador Reader. Spanning the years before the arrival of the Spanish in the early 1500s to the present, this rich anthology addresses colonialism, independence, the nation's integration into the world economy, and its tumultuous twentieth century. Interspersed among forty-eight written selections are more than three dozen images. The voices and creations of Ecuadorian politicians, writers, artists, scholars, activists, and journalists

<p>fill the Reader, from José María Velasco Ibarra, the nation's ultimate populist and five-time president, to Pancho Jaime, a political satirist; from Julio Jaramillo, a popular twentieth-century singer, to anonymous indigenous women artists who produced ceramics in the 1500s; and from the poems of Afro-Ecuadorians, to the fiction of the vanguardist Pablo Palacio, to a recipe for traditional Quiteño-style shrimp. The Reader includes an interview with Nina Pacari, the first indigenous woman elected to Ecuador's national assembly, and a reflection on how to balance tourism with the protection of the Galápagos Islands' magnificent ecosystem. Complementing selections by Ecuadorians, many never published in English, are samples of some of the best writing on Ecuador by outsiders, including an account of how an indigenous group with non-Inca origins came to see themselves as definitively Incan, an exploration of the fascination with the Andes from the 1700s to the present, chronicles of the less-than-exemplary behavior of U.S. corporations in Ecuador, an examination of Ecuadorians' overseas migration, and a look at the controversy surrounding the</p>	<p>selection of the first black Miss Ecuador.</p> <p><u>Complex Classroom Encounters</u> Die Gestalten Verlag-DGV</p> <p>"On Fractures" by Hippocrates (translated by Francis Adams). Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten?or yet undiscovered gems?of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.</p> <p><i>Capitalism and Arithmetic</i> John Wiley & Sons</p> <p>The lord of snark, Lawrence Dorfman, is back! With this treasury of backhanded compliments, sarcastic insults, and catty comebacks, Dorfman gives us transformative wisdom that's sure to change your life—or at least induce a light chuckle. One question plagues us all: How do we survive all the Sturm und Drang of everyday life? The answer is but one word: snark. "She wears her clothes as if they were thrown on by a pitchfork." —Jonathan Swift</p> <p>"Why don't you get a haircut? You look like a chrysanthemum." —P. G. Wodehouse "He's a mental</p>
---	--

midget with the IQ of a fence post." –Tom Waits "They hardly make 'em like him anymore—but just to be on the safe side, he should be castrated anyway." –Hunter S. Thompson "He has a Teflon brain . . . nothing sticks" –Lily Tomlin "He has no more backbone than a chocolate éclair." –Theodore Roosevelt

Snark will keep the wolves at bay (or at least out on the porch). Snark, much like a double scotch, will help you deal with relatives, shopping, and rudeness; it is an outlet for the unleashed vitriolic bile that's saved itself up over the months. Like a shield, it will protect you while you go about your life. Snark is your answer!

Flora brasiliensis Oxford University Press on Demand

Part of Akashic's acclaimed Noir series. Beirut is a city of contradiction and paradox. It is at once urban and rural, a city of violence and forgiveness, memory and forgetfulness. This short story collection is a part of a vibrant, living recovery of Beirut, effected through the literary visions of its authors. The stories here show the vast maze of the city that strictly can't be found in tourist brochures.

On Fractures Legare Street Press

This volume presents the cutting-edge research of leading scientists, re-examining the major debates in Neanderthal research with the use of innovative methods and exciting new theoretical approaches. Coverage includes the re-evaluation of Neanderthal anatomy, inferred adaptations and habitual activities, developmental patterns, phylogenetic relationships, and the Neanderthal extinction; new methods include computer tomography, 3D geometric morphometrics, ancient DNA and bioenergetics. The book offers fresh insight into both Neanderthals and modern humans.

Two Wheels South Legare Street Press

This scholarly work appears at a crucial moment in South Africa. With the country now democratically independent for close to 20 years, the authors

provide a comprehensive description of schooling and overall education, that allows the reader to see if or how the wide social development gaps that existed during the apartheid period are changing. This book is a rare academic contribution to the current linguistic and culturally rich classroom that teachers now work in daily. The authors report that some teachers are flummoxed by what they find, newly trained teachers seem better prepared, while others bring old but good teaching habits into the classroom. Overall, this book, rooted as it is in meticulous, long-term ethnographic classroom observations and multiple teacher interviews, shows that what is effective for the learning of learners is not by any means detachable from demographic, economic or political contexts. With that in mind, the book's intentions and structure are clear, and the initial historical analyses provide insight to the important linguistic, social and cultural connections or disconnections present in contemporary South Africa.

Harza Engineering Company
 McGraw-Hill/Contemporary

In the course of the eighteenth century, understanding human cognitive life came to be construed as something to be explored in terms of the physiology of the sensory organs, the nerves, and the brain: a form of naturalization that effectively moved cognition out of the realm of philosophy as it had traditionally been understood. Bonnet's *Analytical Essay on the Faculties of the Soul* was at the forefront of these developments, and this is its first English translation. Drawing on his earlier work in natural history--he was the leading entomologist of his era--he approaches problems of the nature of the mind via the physiology and anatomy of the brain and sensory systems. His approach is one of 'reverse engineering', starting from an organic statue without faculties, and investigating how it would need to be modified to produce a human being. Bonnet takes up a position that cuts across the standard understanding of the period as a clash between materialism and dualism. While his approach was rigorously naturalistic and physiological, this did not lead him to reject the notion of a soul. Instead, he argues that, in order to make sense of their sensory abilities, we need to attribute a soul to animals as well as human beings. At the same time, he argues that if personal immortality is to be possible, it can be conceived along the lines of insect metamorphosis, which shows how different biological forms can harbour a single identity.

The Snark Bible Twelve

This work provides detailed coverage of the current state of international treaty law in respect of copyright issues relating to the Internet and E-commerce. The centre-piece of the book is an article-by-article analysis of the two key World Intellectual Property Organisation (WIPO) treaties tackling the subject: the WIPO Copyright Treaty and the WIPO Performances and Phonograms Treaty, both negotiated primarily as a response to technological developments such as the Internet. It also includes detailed comparative material showing how the WIPO treaties are being implemented elsewhere in the world, and in particular how the EU, Japan and the US are responding to these key issues. This includes analysis of the key EU Directive on Copyright and Related Rights in the Information Society, which is intended to roll out protection across Europe for copyright holders operating in the digital arena.
