Not since the Industrial Revolution has the world experienced such a vast transformation in the nature of work as is now in progress. The winds of change are buffeting the terms and conditions of work, its content, and its context. The rapidity and discontinuity of these changes produce discomfort and anxiety among employees and

unprecedented challenges to the leadership of organizations. What will the future hold as information technology, global competition, and the quest for efficiency and flexibility rapidly displace jobs and workers? and how can human resource scientists and professionals anticipate what lies ahead and generate better understanding of emerging work behavior?The Changing Nature of Work envisions the future nature of work, its effect on workers and organizations, and the expanded knowledge that will be needed to optimize its returns. The book examines critical post-industrial transformations in work, workers, and the

experience of working and assesses the implications of those changes. It investigates what is driving change at work, what is constraining it, and where work is headed as governments, societies, and work organizations respond to its revolutionary thrust. Demonstrating that most knowledge of work life is rooted in jobs, organizations, and workers of the past, Ann Howard and her contributors call for rethinking the psychology of work. In fourteen original chapters, leading authorities within and outside industrial and organizational psychology--including job design, personnel selection, training, teamwork, organizational commitment, careers,

leadership, performance appraisal, political and labor economics, sociology, and information technology--question, test, revise, and expand the current body of knowledge about work behavior. The authors explore the human side of the changing nature of work in both service and manufacturing settings and provide new directions for the work and workers of tomorrow. They probe the challenges

“ When They Are Done with Us ” by Patricia Smith was selected for inclusion in The Best American Mystery Stories 2013, edited by Otto Penzler and Lisa Scottoline Brand-new stories by: Bill Loehfelm, S.J. Rozan, Ted Anthony, Todd Craig, Ashley

Dawson, Bruce DeSilva, Louisa Ermelino, Binnie Kirshenbaum, Michael Largo, Mike Penncavage, Linda Nieves-Powell, Patricia Smith, Shay Youngblood, and Edward Joyce.

"Staten Island, the last of New York City's five boroughs to enter Akashic's noir series, severs as the setting for this exceptionally strong anthology." --Publishers Weekly (starred review)

"Smith ' s introduction is a revelation. She knows the Island I have in my head. It was like finding a literary sibling, separated since birth."

--Washington Independent "It ' s not enough for noir to be dark. It ' s got to be bad-ass. Its words, its decaying and horrible beauty have got to hit you like a spiked heel dragged from your guts to your gullet. It ' s got to twist the hot knife of passion in that soft space right below your belly while pumping bullets into your heart. It ' s got to make you bleed.

Akashic Books ' latest in their noir series, Staten Island Noir features some dusky and drop-dead gorgeous gems (emphasis on the dead) that do just that."

--Grub Street Daily "Staten Island is the forgotten borough, lacking a subway system, left out of Jay-Z's songs, known for organized crime, bad accents, fake tans, and garbage--which makes it a rich setting for Akashic's noir series...In a thrilling tilt-a-whirl of crime and drama, editor Patricia Smith has carefully chosen writers concerned with the true nature of the small suburban borough."

--Electric Literature's "The Outlet" "Each story in this enjoyable collection has its own charms, if the words 'enjoyable' or 'charms' can be used with these dark tales, and each can stand-alone. However, if, like me, you had always looked at Staten Island as banal and benign, by the book's end your ideas will be forever changed."

--ReviewingTheEvidence.com Patricia Smith, editor of Staten Island Noir, has won the Robert L. Fish Memorial Award for her short story included in the anthology, " When They Are Done with Us. "

Teams have become a dynamic force in the

world of business--cross functional teams, quality circles, customer service teams, autonomous work groups, and even virtual, electronically linked teams. Vested with autonomy, information, and responsibility, today's teams don't just do--they decide.

Although team activity often determines the success or failure of a project, a department--even an organization--research about how teams really work has not kept pace with this exponential growth, until now.

Written for researchers, educators, practitioners, and serious students of the

team phenomenon, Team Effectiveness and Decision Making in Organizations provides the latest research perspective on teams: their nature, their function, their effectiveness, their decision-making processes, and their ability to change the face of organizational life. Using a variety of methodologies, twenty-two leading researchers from the fields of management and social, industrial, and organizational psychology examine team-based projects worldwide, bringing their expertise to bear on core issues from member selection to conflict management to measuring productivity.

In eleven groundbreaking chapters, the book investigates the internal processes and external factors that affect critical decision making in teams and presents tested models and methods for improving team effectiveness in any organizational context. A Jossey-Bass Reader

With the rise of science, we moderns believe, the world changed irrevocably, separating us forever from our primitive, premodern ancestors. But if we were to let go of this fond conviction, Bruno Latour asks, what would the world look

like? His book, an anthropology of science, shows us how much of modernity is actually a matter of faith. What does it mean to be modern? What difference does the scientific method make? The difference, Latour explains, is in our careful distinctions between nature and society, between human and thing, distinctions that our benighted ancestors, in their world of alchemy, astrology, and phrenology, never made. But alongside this purifying practice that defines modernity, there exists another seemingly contrary one: the construction of systems that mix politics, science,

technology, and nature. The ozone debate is such a hybrid, in Latour's analysis, as are global warming, deforestation, even the idea of black holes. As these hybrids proliferate, the prospect of keeping nature and culture in their separate mental chambers becomes overwhelming—and rather than try, Latour suggests, we should rethink our distinctions, rethink the definition and constitution of modernity itself. His book offers a new explanation of science that finally recognizes the connections between nature and culture—and so, between our culture and others, past and

present. Nothing short of a reworking of our mental landscape. We Have Never Been Modern blurs the boundaries among science, the humanities, and the social sciences to enhance understanding on all sides. A summation of the work of one of the most influential and provocative interpreters of science, it aims at saving what is good and valuable in modernity and replacing the rest with a broader, fairer, and finer sense of possibility. Conversaciones escritas National Geographic Books Postcolonial Poetics is about how we read postcolonial and world literatures today, and about how the structures of that writing shape our reading. The book 's eight chapters explore the ways in which postcolonial writing in English from various 21st-century contexts, including southern and West Africa, and Black and Asian Britain, interacts with our imaginative understanding of the world. Throughout, the

focus is on reading practices, where reading is taken as an inventive, border-traversing activity, one that postcolonial writing with its interests in margins, intersections, subversions, and crossings specifically encourages. This close, sustained focus on reading, reception, and literariness is an outstanding feature of the study, as is its wide generic range, embracing poetry, essays, and life-writing, as well as fiction. The field-defining scholar Elleke Boehmer holds that literature has the capacity to keep reimagining and refreshing how we understand ourselves in relation to the world

and to some of the most pressing questions of our time, including resistance, reconciliation, survival after terror, and migration.
