Parametric 2.0 provides the high school student, college student, or practicing engineer with a basic introduction to engineering design while learning the 3D modeling Computer-Aided Design software called Creo Parametric from PTC. The topics are presented in tutorial format with exercises at the end of each chapter to reinforce the concepts covered.

It is richly illustrated with computer screen shots throughout. Above all, this text is designed to help the reader expand their creative talents and communicate their ideas through the graphics language. Because it is easier to learn new information if you have a reason for learning it, this textbook discusses design intent while you are learning

Creo Parametric. At the same time, it shows how knowledge covered in basic engineering courses such as statics, dynamics, strength of materials, and design of mechanical components can be applied to design. You do not need an engineering degree nor be working toward a degree in engineering to use this textbook. Although FEA (Finite Element Analysis) is

---

used in this textbook, its theory is not covered. The first two chapters of this book describe the design process. The meat of this text, learning the basic Creo Parametric software, is found in Chapters 3 through 6. Chapters 7, 8, and 12 deal with dimensioning and tolerancing an engineering part. Chapters 9 and 10 deal with assemblies and assembly

drawings. Chapter 11 deals with family tables used when similar parts are to be designed or used. Chapter 13 is an introduction to Creo Simulate and FEA.

In 1953, South Korea was rated by the U.N. as the poorest country in the world. Five decades later, it is the fifteenth largest economy. Now, South Korea's decisions on how to manage its society and its role as a modern democracy—while

also establishing its policy regarding reunification with North Korea—will determine where the country will go in the next fifty years. The New Korea examines the political, economic, industrial, and societal aspects of Korea today. Will it continue to enjoy an economic boom through new industries while competing against low-wage countries like China and India? Will it return to its role as a stomping ground for other powers? And what should Westerners pay attention to in terms of

---

investment and business opportunities? As South Korea enters the most critical phase of its journey, it is crucial that we understand the factors involving its decisions and evolution. The New Korea is a fascinating account of what is and may become the state of this important region.

*Dwell* "O'Reilly Media, Inc." ?The Manusmriti, the social doctrine of yore, and the Bhagvad-Gita, the spiritual tome in vogue that lay down the discriminatory dharma (duties) of the four social classes (castes) have been the

bugbears of the Hindu backward classes. However, to their chagrin, of late, as the latter is being mindlessly promoted even though the former was constitutionally debunked, they began advocating that it too should be dumped in a dustbin. Ironically, the improbability of their progenitor Krishna, the architect of the Gita, relegating his own ilk to the social margins failed to dawn upon these that Gita supposedly slights, even to this day! Thus, their intellectuals, instead of seeking to reclaim their priceless heritage, albeit after ridding its interpolative

garbage, tend to rubbish it a la throwing the baby with the bathwater, and needless to say they must ponder. Also, it is high time that the Gita-class stop laying store by the self-aggrandizing verses in this Vyasa's classic, evidently inserted by their progenitors that came to bedevil the Hindu spiritual integrity and social harmony. Likewise, the grumblers of the dalit desertions must see the need for setting the Hindu house in order to prevent the fractious poaching by the Church, if not to facilitate the 'hoped for' return of the prodigals. So also

---

those who take pride that Hinduism is the only religion that reckons all faith as true, should be concerned about the 'in vogue' Gita that belittles some of their caste fellows. Besides, this work beckons the feminists to reckon the second of the two interpolations from it cited in the cover image that degrades them in unspeakable terms. It is hoped that this 'overdue' work, might lead the 'denied' castes as well as the favoured folks for an objective approach to the Gita 'as it is' which could dispel the misgivings of the former and the delusions of the latter,

thereby bridging the Hindu emotional gulf with its abridged book that restores its original form. So, this is a must read for every Hindu, whether or not one concurs with its propositions, and likewise for the students of logic and reasoning.

fifteenth year, covering period-inspired design 1700 – 1950.

Commissioned photographs show real homes, inspired by the past but livable.

Historical and interpretive rooms are included; new construction, additions, and new kitchens and baths take their place along with restoration work. A feature on furniture appears in every issue. Product coverage is extensive.

Experts offer advice for homeowners and designers on finishing, decorating, and furnishing period homes of every era. A garden feature, essays, archival material, events and exhibitions, and book reviews round out the editorial. Many readers claim the beautiful advertising—all of it design-related, no “lifestyle” ads—is as important to them as the articles.

instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the

trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great
