your house clean how to get their
in eight minutes homes that kind
flat. Yes, it is of sparkly clean
possible! that they 've
Courtenay only dreamed
Hartford is all about and do it
about working with time
smarter, not leftover for all
harder. She the real life-
shows readers living that you

want to do. Courtenay 's tipstackling Mount and tricks help readers make their lives easier with clever shortcuts and daily, monthly and super-mega all-inclusive deep cleaning checklists. These tips help with actual real-life cleaning situations that you face everyday — like how to rescue a messy house in 8 minutes flat (hint: there are only a few surfaces in your house that really matter here!) as well as which steps in your laundry routine you really can

skip to make Dirtyclothes so much speedier and that you really don ' t need most of the cleaning products in your cupboard. Tackle your toughest cleaning jobs in some of the dirtiest rooms in your home with quick, helpful, realistic tips with this fun, easy-to-read guide. Low-Carbon Green Growth in Asia National Geographic Books A forensic examination of Australian life, this insightful book suggests that contemporary society

has lost touch with its communities and its people. Written from an economist's perspective and based on organizational membership records and surveys, it presents the reasons why the social fabric has begun to fray and outlines the necessary steps to create a better civic and personal life. Distilling various aspects of Australian routine--including religion, sport, and employment--this book reveals what is being lost and how to get it back.

The new 33rd
Edition of the Blue
Book of Gun

Values by S.P. Fjestad has been expanded to 2,432 pages, easily making it the highest page count of any firearms book currently in print. New 2012 makes and models have been included, along with updated values on discontinued firearms and antiques. Once again, the 80-page Photo Percentage Grading System™ provides high resolution color images that are the last word to help ascertain any firearm's correct condition factor based on the percentage of original condition. Revolvers, pistols,

rifles, and shotguns are also shown separately, in addition to NRA Antique Condition Factors. Thousand-Miler Simon and Schuster Leading travel expert and USA Today columnist Christopher Elliott shares the smartest ways to travel in this tip-filled guide from National Geographic. Drawing on more than 20 years of experience as a consumer travel advocate, Elliott gives you the inside scoop on how to navigate the often

perplexing world of travel, with detailed advice on:

- Airlines • car rentals • cruises • hotels and alternative lodging
- the TSA and security • staying connected • review websites • resolving complaints • vacation rentals • passports and visas
- and much more

Full of recommendations, real-life case histories, and the answers to the most common—and confounding—questions, this book is a must-read for anyone traveling anywhere.

Quick and Quiet

National Electrical Code
This journal is a perfect gift for friends and family, male or female. Other features of this notebook are: - 120 pages - 6x9 inches - matte cover This book is convenient for writing. It has the perfect size to carry anywhere for journaling and note taking.

Fridge Love

Cengage Learning
Safe, efficient, code-compliant electrical installations are made simple with the latest

publication of this widely popular resource. Like its highly successful previous editions, the National Electrical Code 2011 spiral bound version combines solid, thorough, research-based content with the tools you need to build an in-depth understanding of the most important topics. New to the 2011 edition are articles including first-time Article 399 on Outdoor, Overhead Conductors with over 600 volts, first-time Article 694 on Small Wind Electric Systems, first-time

Article 840 on Premises Powered Broadband Communications Systems, and more. This spiralbound version allows users to open the code to a certain page and easily keep the book open while referencing that page. The National Electrical Code is adopted in all 50 states, and is an essential reference for those in or entering careers in electrical design, installation, inspection, and safety.
Blue Book of Gun Values Wisconsin Historical Society

Provides practical ways to clean household and personal items, including appliances, upholstery, carpets, and automobiles Africa Macmillan The wildly popular YouTube star behind Clean My Space presents the breakthrough solution to cleaning better with less effort Melissa Maker is beloved by fans all over the world for her completely re-engineered approach to cleaning. As the dynamic new authority on home and living, Melissa knows that to invest any of our precious time in cleaning, we need to see big, long-lasting results. So, she developed her method to help us get

the most out of our effort and keep our homes fresh and welcoming every day. In her long-awaited debut book, she shares her revolutionary 3-step solution: • Identify the most important areas (MIAs) in your home that need attention • Select the proper products, tools, and techniques (PTT) for the job • Implement these new cleaning routines so that they stick Clean My Space takes the chore out of cleaning with Melissa's incredible tips and cleaning hacks (the power of pretreating!) her lightning fast 5-10 minute "express clean" routines for every room when time is tightest, and her techniques for cleaning even the most daunting places

and spaces. And a big bonus: Melissa gives guidance on the best non-toxic, eco-conscious cleaning products and offers natural cleaning solution recipes you can make at home using essential oils to soothe and refresh. With Melissa's simple groundbreaking method you can truly live in a cleaner, more cheerful, and calming home all the time.

In thirty-six thrilling days, Melanie Radzicki McManus hiked 1,100 miles around Wisconsin, landing her in the elite group of Ice Age Trail thru-hikers known as the Thousand-Milers.

In prose that's alternately harrowing and humorous, Thousand-Miler takes you with her through Wisconsin's forests, prairies, wetlands, and farms, past the geologic wonders carved by long-ago glaciers, and into the neighborhood bars and gathering places of far-flung small towns. Follow along as she worries about wildlife encounters, wonders if her injured feet will ever recover, and searches for an elusive fellow hiker known as Papa Bear. Woven throughout her account are details of the history of the still-developing Ice

Age Trail—one of just eleven National Scenic Trails—and helpful insight and strategies for undertaking a successful thru-hike. In addition to chronicling McManus's hike, Thousand-Miler also includes the little-told story of the Ice Age Trail's first-ever thru-hiker Jim Staudacher, an account of the record-breaking thru-run of ultrarunner Jason Dorgan, the experiences of a young combat veteran who embarked on her thru-hike as a way to ease back into civilian life, and other fascinating tales from the trail. Their collective

experiences shed light on the motivations of thru-hikers and the different ways hikers accomplish this impressive feat, providing an entertaining and informative read for outdoors enthusiasts of all levels. *Radar Instruction Manual Pebble* A one-of-a-kind guide to organizing your fridge--including practical tips for meal prep and storage, plus more than 100 recipes--that makes it easier to eat better, save money, and get the most out of your food Practicing "fridge love" is a roadmap to eating healthier, saving money, and reducing food waste while enjoying a beautiful

and harder-working fridge. This book--part organizational guide and part food-prep handbook--is your guide. Author Kristen Hong adopted a nutrient-dense, plant-based diet in an effort to lose weight and improve her health. But amidst the demands of day-to-day life and a busy family, she found it impossible to stick to. The solution? A smarter, better-organized fridge that served her real-life needs. In this invaluable resource, you will discover how a beautifully organized fridge can make your life--including healthy eating for the whole family--easier. It covers general fridge organization (for all models and

configurations) as well as shopping tips, storage guidelines, the best meal-prep containers, and more than 100 easy plant-based recipes made for meal prepping. Simon and Schuster History of the sewing machine is an unchanged, high-quality reprint of the original edition of 1872. Hansebooks is editor of the literature on different topic areas such as research and science, travel and expeditions, cooking and nutrition, medicine, and other genres.As a publisher we focus on the preservation of historical literature.Many works of historical writers and scientists are available today as antiques only. Hansebooks newly publishes these books

and contributes to the preservation of literature which has become rare and historical knowledge for the future.

Lessons in Electric Circuits: An Encyclopedic Text & Reference Guide (6 Volumes Set)

Penguin Mothering is messy. Our joy and hope in raising children doesn't change the reality that being a mom can be frustrating, stressful, and tiring. But just as God is using us to shape our children, God is using our children and motherhood to shape us. In The

Better Mom, author Ruth Schwenk, herself a mother of four children, encourages us with the good news that there is more to being a mom than the extremes of striving for perfection or simply embracing the mess. We don't need to settle for surviving our kids' childhood. We can grow through it. With refreshing and heartfelt honesty Ruth emboldens moms to: Find freedom and walk confidently in purpose Create a God-honoring home environment

Overcome unhealthy and destructive emotions such as anger, anxiety, and more Avoid glorifying the mess of mom-ing or idolizing perfection Cultivate life-giving friendships At the heart of The Better Mom is the message that Jesus calls us to live not a weary life, but a worthy life. We don't have to settle for either being apathetic or struggling to be perfect. Both visions of motherhood go too far. Ruth offers a better option. She says, "It's okay to

come as we are, but what we're called to do and be is far too important to stay there! The way to becoming a better mom starts not with what we are doing, but with who God is inviting us to become." I Mariner Books Asia is at a crossroads. It is the world's most populous region, it accounts for a rising share of global greenhouse gas emissions, and it is the region most vulnerable to climate risks. Low-Carbon Green Growth in Asia: Policies and Practices

recognizes that in order to develop the region, low-carbon green growth is imperative. The volume reviews low-carbon policy initiatives taken by Asian countries at the national, sectoral, and local levels while assessing their achievements, identifying the remaining gaps, and examining new opportunities. The volume notes that actions taken by several Asian countries to date have been both impressive and replicable and that the region's commitment to low-carbon green growth represents a move away from the old economic notion of "grow first and clean later." However, emerging Asia's carbon emissions remain high, and failure to act swiftly could increase mitigation costs by two to five times and lock in a high-carbon footprint for decades to come. *History of the Sewing Machine* Hampton-Brown Books An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist

and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their

peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you

need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

McGraw Hill Professional

This book is about abduction, 'the logic of Sherlock Holmes', and about how some kinds of abductive reasoning can be programmed in a computer. The work brings

together Artificial Intelligence and philosophy of science and is rich with implications for other areas such as, psychology, medical informatics, and linguistics. It also has subtle implications for evidence evaluation in areas such as accident investigation, confirmation of scientific theories, law, diagnosis, and financial auditing. The book is about certainty and the logic-computational foundations of knowledge; it is about inference in

perception,
reasoning
strategies, and
building expert
systems.
