### IPv6 Deployment Guide

IEEE Computer Society

This book examines the convergence of media in the largest residential virtual community to date in the gaming world: Second Life. This user content---driven platform has brought media makers and audiences together in interactive environments where news, entertainment, and art have become programming for virtual media networks with implications for traditional mainstream programming

and distribution. New media moguls are emerging from Second Life and expanding to the larger Metaverse. This book explores media's role in reporting and reflecting the social, political, and economic issues within Second Life and beyond, and includes more than a dozen interviews of active Second Life residents.

### **A Guide to a New Interdisciplinary Field**

This volume examines Max Steiner's Academy Award winning score for the 1942 film *Now, Voyager*, combining a full and detailed musical analysis of the score with critical and historical perspectives on the film.

A Film Score Guide Ed Rosenthal

This is the first textbook of Virtual Anthropology, the new science that combines elements

from fields as diverse as anthropology, medicine, statistics, computing, scientific visualization, and industrial design. The book is intended for students in any of these or nearby fields within biology, medicine, or engineering and for teachers, journalists, and all others who will enjoy the many examples from our real biological world. After a general introduction to the field and an overview, the book is organized around six themes conveyed in more than 300 pages of text accompanied by hundreds of carefully annotated images: medical imaging and 3D digitising techniques, electronic preparation of individual specimens, analysis of complex forms in space one or many at a time, reconstruction of forms that are partly missing or damaged, production of real objects from virtual models, and, finally, thoughts about data accessibility and sharing and the implications of all this for the future of anthropology. The authors' emphasis is not on technical details but rather on step-by-step explanations of the wealth of

---

examples included here, from brain evolution to surgical planning, always in light of the relevance of these approaches to science and to society. All readers are encouraged to try out the techniques on their own using the tools and data included in the Online Extra Materials resource.
