How to Get Rid of Sciatica and Lower Back Pain Naturally Without Exercises
F. A. Davis Company
This book looks at various aspects of tourism education in Asian countries and the impacts of sustainable development in tourism

education to the Asian student markets. It provides an insightful and authoritative account of the various issues that are shaping the higher educational world of tourism education in Asia and for its Asian students overseas, and it highlights the creative, inventive and innovative ways that educators are responding to these issues. The book is composed of contributions from specialists in the field and is international in scope. It is divided into four parts: an introduction setting the scene of tourism education and Asia; case studies of tourism education in various Asian countries; case studies of tourism education of Asian students abroad and their transnational student experiences; and broader perspectives on intra-Asian and transnational tourism education. The book provides a systematic guide to the current state of knowledge on tourism education and Asia and its future direction, and is essential reading for students, researchers, educational practitioners, and academics in Tourism Studies.

Perplexing Problems
Springer

Maximizing reader insights into the principles of designing furniture as wooden structures, this book discusses issues related to the history of furniture structures, their classification and characteristics, ergonomic approaches to anthropometric requirements and safety of use. It presents key methods and highlights common errors in designing the characteristics of the materials, components, joints and structures, as well as looking at the challenges regarding developing associated design documentation. Including analysis of how designers may go about calculating the stiffness and endurance of parts, joints and whole structures, the book analyzes questions regarding the loss of furniture stability and the

resulting threats to health of the user, putting forward a concept of furniture design as an engineering processes. Creating an attractive, functional, ergonomic and safe piece of furniture is not only the fruit of the work of individual architects and artists, but requires an effort of many people working in interdisciplinary teams, this book is designed to add important knowledge to the literature for engineer approaches in furniture design.
