point, the curl developers removed SFTP support from the libcurl. If you need to download a file, via SSH, you'll need to use the ...

Libcurl Ssh User Guide - ohyo.logodesigningcompany.co

Note that both these protocols work with "users" and you do not ask for a file anonymously or with a standard generic name. Most systems will require that users authenticate, as outlined below. When requesting a file from an SFTP or SCP URL, the file path given is considered to be the absolute path on the remote server unless you specifically ask for the path relative to the user's home directory.
