Cleveland : Press of Case Western Reserve University

Neuropsychology is the study of the relationship between behaviour, emotion, and cognition on the one hand, and brain function on the other.

Psychology Library Editions: Neuropsychology (12 Volume set) presents titles, originally published between 1981 and 1993, covering a variety of areas within neuropsychology, a relatively new discipline at the time, as it firmly established itself within the field of psychology. It includes contributions from well-respected

academics, many still active in neuropsychology today.

Routledge

This professional primer provides the blueprint to help you create a school library program, covering all aspects of library management such as budgeting, eBook use, purchasing, and teacher collaboration. Advice and strategies from experts in the field will help you master collection development, library administration, recruitment, and staffing. • Covers all aspects of library administration, including operations, technology, and resource management • Helps new or experienced school librarians find

---

ways to launch or elevate their programs • Provides valuable resources for implementing a quality library program • Features lesson plans using Common Core State Standards • Includes short sidebar articles from noted experts in the school library field and tips from experienced librarians

**"The Compleat Librarian"** ABC-CLIO

Supervisors at all levels need practical advice and specific approaches on how to evaluate staff. This manual provides background principles and proven guidelines for describing positions and evaluating individuals occupying them. Specific examples and step-by-step approaches to job description, job analysis, and performance appraisal should enable supervisors to write job enrichment specifications of an individual employee's job related strengths and weaknesses. Forms and checklists are also included.

Today's researchers have access to  
more information than ever before.  
Yet the new material is both  
overwhelming in quantity and  
variable in quality. How can  
scholars survive these twin

problems and produce groundbreaking  
research using the physical and  
electronic resources available in  
the modern university research  
library? In *Digital Paper*, Andrew  
Abbott provides some much-needed  
answers to that question. Abbott  
tells what every senior researcher  
knows: that research is not a  
mechanical, linear process, but a  
thoughtful and adventurous journey  
through a nonlinear world. He  
breaks library research down into  
seven basic and simultaneous  
tasks: design, search,  
scanning/browsing, reading,  
analyzing, filing, and writing. He  
moves the reader through the  
phases of research, from confusion  
to organization, from vague idea  
to polished result. He teaches how  
to evaluate data and prior  
research; how to follow a trail to  
elusive treasures; how to organize  
a project; when to start over;  
when to ask for help. He shows how  
an understanding of scholarly  
values, a commitment to hard work,  
and the flexibility to change  
direction combine to enable the  
researcher to turn a daunting mass  
of found material into an  
effective paper or thesis. More

Handbook of Medical Library Practice Mometrix Media LLC

"Jesse Shera's essays on books, reading, and libraries are witty, often philosophical pieces whose essential message, hinted at rather than repetitiously stated, is that librarianship is an art, not a trade or a technology. These fifty-one essays...are concerned with the librarian, his problems and experiences, the place he works, the tools he uses, the books he puts on his shelves, the public he serves, and what his future holds"--Dust jacket.

*Library 101: A Handbook for the School Librarian, 2nd Edition* Neal Schuman Pub  
"With over 3.5 million homeschooled students in the U.S., this book admirably explores the intersection of this growing and important grass roots movement and libraries of all kinds, showing how and why libraries are a vital element in the homeschooling movement."—Bruce R. Schueneman, Library Director, James C. Jernigan Library, Texas A&M University-Kingsville "A rich and exciting sourcebook for librarians serving those outside of formal schooling."—Tim Gorichanaz, Drexel University, Philadelphia "This book effectively covers all the bases ensuring positive experiences and outcomes for libraries serving home school

families in their service areas."—Deb Biggs Tenbusch, Librarian and Account Manager, Gale, Cengage Learning, Farmington Hills, Michigan "Whether starting new programs or expanding current ones, these chapters will help you to engage and prepare your resources to help homeschoolers."—Kathleen Christy, Adult Services Manager, Blount County Public Library, Maryville, Tennessee "21st century homeschoolers are facing new challenges and this book presents fresh solutions and describes opportunities you may not realize existed for your library to serve these important patrons."—Robert Perret, Contributor, Creativity for Library Career Advancement "I think infinite possibilities best describes this must-read book for public and academic

librarians who seek to find ways to engage, support and serve the growing homeschool community."—Anastasia Varnalis-Weigle, Associate Professor, University of Maine, Augusta "Librarians of all types, as well as library stakeholders, will find Homeschooling and Libraries a great resource to help identify needs and ways to support the growing homeschooling community."—Michelle McKinney, Reference and Web Services Librarian, University of Cincinnati Blue Ash College, Cincinnati, Ohio "An impressively-researched volume that draws on a variety of perspectives, offering insight into the needs of homeschooled populations, including case studies, needs assessment, and future possibilities for programming, continuing

---

education, and outreach."—Erin Pappas, Research Librarian for the Humanities, University of Virginia Libraries "This practical book will assist libraries as they develop ways to reach out to home educating families."—Ruth Elder, Cataloging Librarian, Troy University, Troy, Alabama "This book reopened my mind to the wonders that libraries in all of their aspects and attributes have to offer students including the unique and diverse students who are homeschooled."—Jim Jipson, University of West Florida, Pensacola, Florida As families are looking for better ways to educate their children, more and more of them are becoming interested and engaged in alternative ways of schooling that are different, separate, or opposite of the traditional classroom. Homeschooling has become ever more creative and varied as families create custom-tailored curricula, assignments, goals, and strategies that are best for each unique child. This presents a multitude of challenges and opportunities for information institutions, including public, academic, school, and special libraries. The need for librarians to help homeschool families become information and media literate is more important than ever. This collection of essays provides a range of approaches and strategies suggested by skilled professionals as well as veteran homeschool parents on how to best serve the diverse needs and learning experiences of homeschooled youth. It includes information on needs assessments for special needs students, gifted students, and African American students; advice on how to provide support for the families of homeschoolers; case studies; and information on new technologies that could benefit libraries and the homeschooler populations that they serve."With over 3.5 million homeschooled students in the U.S., this book admirably explores the intersection of this growing and important grass roots movement and libraries of all kinds, showing how and why libraries are a vital element in the homeschooling movement."—Bruce R. Fundamental Managerial Accounting Concepts 7e  
McFarland

The massive shift in how information is now published and collected has space, cost, and service policy implications for every library's reference collection. This detailed how-to has two purposes: first, to help reference librarians plan, select, and develop these new

collections; second, to help them rework their services in light of changing collections. Cassell discusses selection criteria (with examples), examines the future of the format in the reference collection, and the types of material (e.g.: full text encyclopedia or index). Readers are guided through the necessary collection development decisions, including the advantages and disadvantages of print vs. electronic media for content, content appropriateness for the format, demand, cost (required software and hardware), space (required equipment), time (installation), and the learning curve needed to use -- and teach -- new electronic reference tools. Details on reference book publishers and trends, recommended print and electronic evaluation tools, user and staff education, suggestions, model policies, checklists, forms, and planning

---

tools for the new reference department complete this practical and essential manual. *County Library Number ...* McFarland

Once upon a time, looking for a book in the library involved an ancient mechanism called the card catalog. Now, most card catalogs are gone forever and patrons gaze at computer screens. As electronic technology becomes more pervasive, or invasive, librarians and library users continue to be embroiled in the controversy over the function of a library and its staff. As "knowledge" loses ground to "information" and techware pre-empts book budgets, library collections are "purged" and reference librarians find their role diminished—except to put more paper in the printer (to serve the voracious wood-pulp appetite of the new paperless

society). The essays in this book analyze the complex issues surrounding the postmodern library and its increasingly impersonal nature, as the librarian at its center is more and more frequently marginalized. The insights and observations, both practical and thoughtful are those of a practicing librarian. An annotated bibliography guides the reader to additional important articles and books that explore the future of the library and the role of technology.
