Lifan KP Mini 150cc TOP SPEED TEST

The second one comes with a 22mm carb. I have a 26mm Mikuni I tried on my X18 110cc, it was to big. A 24 or 26mm would probably work on that

140cc engine, the one has bigger valves and ports.

It appears to be a 3 or 4 speed semi-automatic (clutchless) engine. With these engines, there is no clutch lever. You just let up on the gas and shift, then get back on it. When you said you had a Lifan with an internal CVT, I was expecting to see an engine like this scooter engine. Notice how long the scooter engine is because of the CVT belt.

My only experience has been with the 110cc and 140cc horizontal engines

and the 200cc vertical engine. The 110 isn't a whole lot faster than the stock CT90 engine but it does have a lower first gear and climbs quite well off road without the need for a low range. Top speed is around 50 mph and it takes a while to get there.
