Lifan 110cc Engine (4-Speed Semi-Auto) (w/ Air Carby Kit ...
My only experience has been with the 110cc and 140cc horizontal engines and the 200cc vertical engine. The 110 isn't a whole lot faster than the stock CT90 engine but it does have a lower first gear and climbs quite well off road without the need for a low range. Top speed is around 50 mph and it takes a while to get there.

It appears to be a 3 or 4 speed semi-automatic (clutchless) engine. With these engines, there is no clutch lever. You just let up on the gas and shift, then get back on it. When you said you had a Lifan with an internal CVT, I was expecting to see an engine like this scooter engine. Notice how long the scooter engine is because of the CVT belt.
