An intimate portrait of the little-known aspects of Swami Vivekananda's life. Wandering mystic, India's spiritual ambassador to the West and founder of the Ramakrishna

Mission, Swami Vivekananda awakened India's masses to the country's spiritual richness while stressing the importance of scientific inquiry. These aspects of Swamiji's life have been well chronicled by Swamiji himself, through his letters, speeches and writings; his own brothers who between them have written more than a hundred books; his co-disciples, disciples and others whose lives were enriched by their interactions with him; and, more than a century after his death, followers who had only read or heard of the magnetic personality of this revered teacher. Gleaned from all these sources, through painstaking research Sankar's biography focuses on the personal life of the saint: What was Vivekananda like as a man? What role did his mother play in his life, both before and after he renounced all family ties? Could he reconcile the duties of a monk with the duties of an eldest son? What prompted him to promote Vedanta and biriyani in the West? Did the long drawn battles over family property affect his health and cut short his life? Did his sister commit suicide? Why did his brother not write a single letter for six years when he was wandering around the world? What was Swamiji's favourite dish and what fruit did he like the least? What was his height? Where did he have his second heart attack? How much did the Calcutta doctor charge him at his chamber? Sankar's composite picture of the monk as man has sold over one lakh copies in Bengali and this translation brings the unfamiliar Vivekananda to a larger readership.

Vedanta Philosophy: Famous lectures in Yoga from the last survivor of the direct disciples of Ramakrishna. "The doctrine of Reincarnation says that each individual soul is potentially perfect and is gradually unfolding its powers and making them actual through the process of Evolution."
-Swami Abhedananda Swami Abhedananda compiled for you this fabulous book of his five lectures on reincarnation. In each lecture he examines the beliefs of religions and cultures while explaining the scientific basis of reincarnation. This is a very deep book and powerful to those who seek a deeper understanding of reincarnation. "In these discourses the Swami Abhedananda considers the questions of evolution and the resurrection in their bearing upon the ancient teaching of rebirth, the truth, logic and justice of which are rapidly permeating the best thought of the Western world. For the preservation of this doctrine mankind is indebted to the literary storehouses of India, the racial and geographical source of much of the vital knowledge of Occidental peoples. Reincarnation is shown in the present volume to be a universal solvent of life's mysteries. It answers those questions of children that have staggered the wisest minds who seek

to reconcile the law of evolution and the existence of an intelligent and just Creator, with the proposition that man has but a single lifetime in which to develop spiritual self-consciousness. It is commended to every thinker." -Mind, February, 1900 "It is a work which will appeal to the novice for its simplicity and definite quality, and to the student for its wealth of knowledge and suggestion." -Vedanta Monthly Bulletin, September, 1907 "The book should prove a valuable acquisition." -The Evening Sun, N. Y., December 21, 1907 "This is the work of a man of fine education and fine intellect....(Reincarnation) as expounded by Swami Abhedananda is very plausible, quite scientific, and far from uncomfortable. The exposition contained in this little book is well worth reading for all students of metaphysics. There is not the slightest danger of its converting or perverting any one to a new and strange religion. Reincarnation is not religion, it is science. Science was never known to hurt anybody but scientists." -Brooklyn Eagle, December 13, 1907 Contents I.--Reincarnation II.--Heredity and Reincarnation III.--Evolution and Reincarnation IV.--Which is Scientific, Resurrection or Reincarnation?
