### Life on an Ocean Planet

Sea life The oceans are home to millions of Earth's plants and animals—from tiny single-celled organisms to the gargantuan blue whale, the planet's largest living animal. Fish, octopuses, squid,...

### Life On An Ocean Planet

Oceans cover over 70% of the planet and profoundly influence many crucial physical and biological processes. Life began in the sea, and two thirds of the major forms of animal life are either primarily or exclusively marine. About half of the human population lives within 200 km of the coast<sup>1</sup>. Thus, the oceans are a crucial component of planetary health (including human health<sup>2</sup>) by any conceivable standard.
