PPT – Life on an Ocean Planet PowerPoint presentation ...

Earth's oceans are teeming with life, which creates changes in ocean color that are visible from space. Tiny plants, phytoplankton, bloom for hundreds of miles, coloring the oceans and giving us clues about complex marine ecosystems.

Driven by wind, temperature, salinity, and other forces, currents on the ocean surface cover our planet.

[Miami Beach Senior High School / Overview](#)

Oceans cover over 70% of the planet and profoundly influence many crucial physical and biological processes. Life began in the sea, and two thirds of the major forms of animal life are either primari- ly or exclusively marine. About half of the human

population lives within 200 km of the coast¹. Thus, the oceans are a crucial component of planetary health (including human health²) by any conceivable standard.

Sediments that reach the
ocean may be deposited in a
delta which is in many ways
like an underwater alluvial
fan. Sediments are
distributed in a fan-shaped
body that grows outward

(seaward) with time.
Longshore currents will
transport sediments along the
coast. ... Life on an Ocean
