What makes a frog an amphibian but a snake a reptile? Both classes may lay eggs, but they have different skin coverings and breathe in different ways. Pages of fun facts will help kids identify each animal in the class like a pro after reading the fourth book in Arbordale 's Compare and Contrast series. Similar to Polar Bears and Penguins, Clouds and Trees; Amphibians and Reptiles uses stunning photographs and simple non-fiction text to get kids thinking about the similarities and differences between these two animal classes.

Herping is the observation of amphibians and reptiles for recreation or for the production of citizen science—the cold-blooded equivalent of birding. The Field Herping Guide: Finding Amphibians and Reptiles in the Wild is the first book to explore the fun and fascinating world of observing herpetofauna across North America. The natural world holds an amazing diversity of herps, some as close as our own backyards. This guidebook is geared toward new field herpers and uses proven methods from professional herpetologists Mike Pingleton and Joshua Holbrook. The guide addresses basic questions new field herpers have about amphibians and reptiles: What do I need to know about their biology? Where do I look for them, and when? These topics are covered in a straightforward

manner, with images, a glossary of essential terms, personal anecdotes, and informational vignettes that support the subject material.

TOPICS COVERED INCLUDE: Getting Started Understanding Herp Behavior Finding Herps Catching and Handling Herps Safety in the Field Ethics and Etiquette, Rights and Responsibilities Classification, Taxonomy, and Species Identification Citizen Science and Data Collection Herp Photography Social Aspects of Field Herping A History of Field Herping

A Compare and Contrast Book Macmillan This manual covers information essential for anyone using pesticides on California farms, including growers, managers and employees in an easy-to-use format; now with color photographs and illustrations. Read this book carefully to prepare for the Private Applicator Certification test. DPR uses this test to certify farm owners, leaseholders, and managers who may have to purchase restricted materials, as well as farm employees who supervise pesticide handlers or will be training handlers and fieldworkers to work safely around pesticides. A list of knowledge expectations (descriptions of what you should know after reading the chapter) are given at the beginning of each chapter to guide you as you study. Individual knowledge expectations appear alongside relevant content throughout each chapter, which will help you focus on the information that is most likely to appear on the examination. Covers pesticide labels, worker safety (handlers and fieldworkers), how to mix and apply pesticides, calibration, the hazards of pesticide use including heat related illness, and pesticide emergencies. Presents an overview of integrated management principles An appendix includes sample training forms for pesticide handlers and fieldworkers.
