The challenge of widening access and participation in higher education in a manner that ensures students are successful in their studies is a major issue globally and a significant research-focus within higher education studies and higher education policy. Similarly, the challenge of under-preparedness of students entering higher education has become increasingly pertinent as universities in both developed and developing countries struggle to improve their throughput rates in a context in which schooling no longer seems to provide sufficient preparation for entering university. In this book Merridy Wilson-Strydom applies the capabilities approach to better understand university access and participation and draws on a rich case study from South Africa to critically and innovatively explore the complex and contradictory terrain of access with success. The book integrates quantitative and qualitative research with theory and practical application to provide a new framework for considering and improving the transition from school to university. University Access and Success will appeal to academics and researchers in the field of higher education internationally. The book also contributes to the growing body of international and comparative scholarship on the capabilities approach in higher education and will therefore be of value to higher education practitioners, such as those working in the promotion of teaching and learning, higher education quality assurance, institutional research and student affairs.

A revolutionary work since its publication, *Black Power* exposed the depths of systemic racism in this country and provided a radical political framework for reform: true and lasting social change would only be accomplished through unity among African-Americans and their independence from the preexisting order. An eloquent document of the civil rights movement that remains a work of profound social relevance 50 years after it was first published.

Study & Master Life Sciences Grade 10 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Life Sciences. The comprehensive Learner's Book includes: * an expanded contents page indicating the CAPS coverage required for each strand * a mind map at the beginning of each module that gives an overview of the contents of that module * activities throughout that help develop learners' science knowledge and skills as well as Formal Assessment tasks to test their learning * a review at the end of each unit that provides for consolidation of learning * case studies that link science to real-life situations and present balanced views on sensitive issues. * 'information' boxes providing interesting additional information and 'Note' boxes that bring important information to the learner's attention

This edition of *Science and Creationism* summarizes key aspects of several of the most important lines of evidence supporting evolution. It describes some of the positions taken by advocates of creation science and presents an analysis of these claims. This document lays out for a broader audience the case against presenting religious concepts in science classes. The document covers the origin of the universe, Earth, and life; evidence supporting biological evolution; and human evolution. (Contains 31 references.) (CCM)

Scientific Study from the year 2018 in the subject Economics - Finance, grade: 12, , language: English, abstract: The issue of service quality has been at the center of the ongoing academic and business interest since the late 1970s. Of course buyers have always been concerned about quality, but increasing competition in the current markets of many services has made consumers more selective in the service they choose. The study focuses on banking services, their quality and customer satisfaction in the banking system: as a case study, services provided by banks in Shkodra have been taken. For the realization of the study a complete analysis was used based on the data collected from the questionnaire with the clients of the commercial banks operating in Shkodra. The data provided by the questionnaire analyzed the real level of banking services in Shkodra. These services are seen in terms of their diversity as well as the level of quality of services they offer to attract the customer. The study also highlights the gaps that these banks have in their services under contemporary conditions. The purpose of this study is to confirm the theory that banks should do more to perceive the customer about the quality of services. Banks try to provide modern services, but the most important is to identify and perceive customer needs about services because what may be good for the bank may not be the good for the customer.

Sponsored by the National Council of Teachers of Mathematics and written by leading experts in the field of mathematics education, the

Handbook is specifically designed to make important, vital scholarship accessible to mathematics education professors, graduate students, educational researchers, staff development directors, curriculum supervisors, and teachers. The Handbook provides a framework for understanding the evolution of the mathematics education research field against the backdrop of well-established conceptual, historical, theoretical, and methodological perspectives. It is an indispensable working tool for everyone interested in pursuing research in mathematics education as the references for each of the Handbook's twenty-nine chapters are complete resources for both current and past work in that particular area.

Scientific Study from the year 2018 in the subject Economics - Finance, grade: 12, , language: English, abstract: This study examines the determinants of profitability of commercial banks in Albania. These determinants are categorized into two groups, internal factors that are the bank specific factors and external factors that are further divided into macroeconomic factors and industry specific factors. The main objective of the study is to determine the factors affecting the profitability of commercial banks and making some recommendations, that maybe can help the management and policymakers. A panel data with 16 commercial banks in Albania is analyzed for the period 2009-2014. Two indicators are used (dependent variables) for the measurement of profitability, return on assets (ROA) and return on equity (ROE). Banking specific factors that are used in this study include variables such as bank size, asset management, credit risk, liquidity of assets, capital adequacy, operational efficiency and cost of financing. On the other hand is taken into consideration only one industry specific factor, which is the concentration and macroeconomic factors such as GDP, inflation and exchange rate. To meet the main object of the research, the study is based mainly on quantitative research method, which is supplemented by a qualitative method. Quantitative data were obtained mainly from the financial statements of commercial banks, by INSTAT, Bank of Albania, and World Bank, in order to make empirical analysis needed to identify and measure the determinants of bank profitability. In particular, multiple regression analysis was used to measure the impact of the determinants of bank profitability. On the other hand, qualitative data were collected through unstructured interviews conducted with executives of finance in the albanian commercial banks. To realize empirical analysis were used the software SPSS 22 and Eviews 7.

Scientific Study from the year 2020 in the subject Economics - Finance, grade: 12, , language: English, abstract: This work aims to study the impact of public and private debt on economic growth in Albania during the period 2014 to 2018, as well as the main determining factors for both indicators. The methodology used is based on econometric regression analysis. The results showed that public and private debt has a statistically significant impact on economic growth in Albania. The author aims to answer the question: Does private and public debt have an impact on economic growth in Albania? The purpose of this work is to analyze the effects of public debt and private debt on the country's macroeconomic indicators, especially the emphasis is on efficiency of public and private borrowing borrowing on GDP. The effects of public debt on GDP vary from one country to another, studying the factors that influence the emerging differences between these countries and made possible the comparison of private and public borrowing borrowing effect on the economy of any country. Following the goal, this work will focus on the necessity of state debt and how the state ensures that debt, the importance of private sector development and business role over private borrowing on the role of public debt and private borrowing growth economic situation of the country. Albania has managed to maintain positive economic growth and macroeconomic stability over the past decade, but its high level of public debt, with an upward trend over the last three years, has been seen as a concern by many domestic and foreign economists. When it comes to debt, both public and private debt must be taken into consideration. Private debt analysis takes on particular importance because private debt is associated with financing business projects and increasing consumer demand, which serve economic growth and improve the country's macroeconomic parameters.

What, if anything, is similar about citizen participation at the local level in Canada and China? The answer, of course, is politically sensitive. There are many in Canada who would claim that the question is absurd. How can there be meaningful citizen participation in a country where there are significant restrictions on political activity, including on the right to form organizations with political purposes? Presenting the work of leading scholars, *Citizen Participation at the Local Level in China and Canada* examines how citizens in each country participate at the local level. The book examines the development of citizen participation in local governance in Canada and China respectively. It then covers the characteristics of political culture and climate on local participation, highlighting factors especially unique to urban poor, class migration, and aboriginal and immigrant populations. The chapters also explore means of protest, demonstration, and articulation of preference by populations and issues where citizen participation has effected change such as land use, housing, urban development, and resource sustainability. The book includes case studies that compare Canadian and Chinese communities and extrapolate interesting policy-level changes at the local level based on citizen behavior and involvement. It underscores the similarities and differences in political participation in both countries and sets the stage for the steps in the citizen participation in both countries.

First published in 1985, the *Handbook for Achieving Gender Equity Through Education* quickly established itself as the essential reference work concerning gender equity in education. This new, expanded edition provides a 20-year retrospective of the field, one that has the great advantage of documenting U.S. national data on the gains and losses in the efforts to advance gender equality through policies such as Title IX, the landmark federal law prohibiting sex discrimination in education, equity programs and research. Key features include: Expertise –

Like its predecessor, over 200 expert authors and reviewers provide accurate, consensus, research-based information on the nature of gender equity challenges and what is needed to meet them at all levels of education. Content Area Focus – The analysis of gender equity within specific curriculum areas has been expanded from 6 to 10 chapters including mathematics, science, and engineering. Global/Diversity Focus – Global gender equity is addressed in a separate chapter as well as in numerous other chapters. The expanded section on gender equity strategies for diverse populations contains seven chapters on African Americans, Latina/os, Asian and Pacific Island Americans, American Indians, gifted students, students with disabilities, and lesbian, gay, bisexual, and transgender students. Action Oriented – All chapters contain practical recommendations for making education activities and outcomes more gender equitable. A final chapter consolidates individual chapter recommendations for educators, policymakers, and researchers to achieve gender equity in and through education. New Material – Expanded from 25 to 31 chapters, this new edition includes: *more emphasis on male gender equity and on sexuality issues; *special within population gender equity challenges (race, ability and disability, etc); *coeducation and single sex education; *increased use of rigorous research strategies such as meta-analysis showing more sex similarities and fewer sex differences and of evaluations of implementation programs; *technology and gender equity is now treated in three chapters; *women ' s and gender studies; *communication skills relating to English, bilingual, and foreign language learning; and *history and implementation of Title IX and other federal and state policies. Since there is so much misleading information about gender equity and education, this Handbook will be essential for anyone who wants accurate, research-based information on controversial gender equity issues—journalists, policy makers, teachers, Title IX coordinators, equity trainers, women ' s and gender study faculty, students, and parents.

Aligned with current TExES standards, our study guide provides a comprehensive review of all six domains, including scientific inquiry and processes; cell structures and processes; heredity and evolution of life; diversity of life; interdependence of life and environmental systems; and science learning, instruction, and assessment. We give you a thorough review of all domains, competencies, skills, and focus statements tested on the TExES Life Science 7-12 (238) exam. Unlike other teacher certification test preparation material, our TExES Life Science 7-12 study guide drills all the way down to the focus statement level, providing detailed examples of the range, type, and level of content that appear on the test. The book includes one full-length multiple-choice practice test to help you test your knowledge, understand how the exam is weighted, and identify skills and competencies you need to focus on. Our detailed answer explanations reference related skills in the book, allowing you to identify your strengths and weaknesses and interact with the content effectively. Maximize your study by prioritizing domains and skills you need to focus on the most to pass the exam.

Science, engineering, and technology permeate nearly every facet of modern life and hold the key to solving many of humanity's most pressing current and future challenges. The United States' position in the global economy is declining, in part because U.S. workers lack fundamental knowledge in these fields. To address the critical issues of U.S. competitiveness and to better prepare the workforce, A Framework for K-12 Science Education proposes a new approach to K-12 science education that will capture students' interest and provide them with the necessary foundational knowledge in the field. A Framework for K-12 Science Education outlines a broad set of expectations for students in science and engineering in grades K-12. These expectations will inform the development of new standards for K-12 science education and, subsequently, revisions to curriculum, instruction, assessment, and professional development for educators. This book identifies three dimensions that convey the core ideas and practices around which science and engineering education in these grades should be built. These three dimensions are: crosscutting concepts that unify the study of science through their common application across science and engineering; scientific and engineering practices; and disciplinary core ideas in the physical sciences, life sciences, and earth and space sciences and for engineering, technology, and the applications of science. The overarching goal is for all high school graduates to have sufficient knowledge of science and engineering to engage in public discussions on science-related issues, be careful consumers of scientific and technical information, and enter the careers of their choice. A Framework for K-12 Science Education is the first step in a process that can inform state-level decisions and achieve a research-grounded basis for improving science instruction and learning across the country. The book will guide standards developers, teachers, curriculum designers, assessment developers, state and district science administrators, and educators who teach science in informal environments.

Research in Education

The second edition of the Handbook of Test Development provides graduate students and professionals with an up-to-date, research-oriented guide to the latest developments in the field. Including thirty-two chapters by well-known scholars and practitioners, it is divided into five sections, covering the foundations of test development, content definition, item development, test design and form assembly, and the processes of test administration, documentation, and evaluation. Keenly aware of developments in the field since the publication of the first edition, including changes in technology, the evolution of psychometric theory, and the increased demands for effective tests via educational policy, the editors of this edition include new chapters on assessing noncognitive skills, measuring growth and learning progressions, automated item generation and test assembly, and computerized scoring of constructed responses. The volume also includes expanded coverage of performance testing, validity, fairness, and numerous other topics. Edited by Suzanne Lane, Mark R. Raymond, and Thomas M. Haladyna, The Handbook of Test Development, 2nd edition, is based on the revised Standards for Educational and Psychological Testing, and is appropriate for graduate courses and seminars that deal with test development and usage, professional testing services and credentialing agencies, state and local boards of education, and academic libraries serving these groups.
