Life science is one of the two major branches of natural science, the other being physical science, which is concerned with non-living matter. By definition, biology is the natural science that studies life and living organisms, with the other life sciences being its sub-disciplines. Some life sciences focus on a specific type of organism.

Today life diversity on earth is the result of evolution. On Earth life began at least 4 billion years ago and it has been evolving every year. In the beginning all living things on earth were single celled organism, after several years multicellular organism evolved after that diversity in life on earth increased day by day.

As Einhorn and other big names struggle, these rising hedge fund stars were up 40% last year. The common thread among some of the best hedge fund performers is in-depth sector expertise. In a stock market where 5 out of the 6 most valuable companies in the S&P 500 are technology firms, it's more important than ever to be an expert on rapidly changing technology trends and consumer tastes.
