In a world without gravity, one would be weightless, but always nauseous. Because of this, it would be very difficult to complete a lot of your daily activities without throwing up. If you tried to eat something while you and your food are floating around, you will probably have a lot of trouble trying to hold your food down.

how would life be without gravity - Answers

It would be hard to live life without gravity. You would throw up your back would ache and your face would puff up. When you would go back to earth it would take a while to get use to. Asked in...

The only way for Earth to have no gravity is for it to have no mass, effectively denying its existence altogether, so life on Earth becomes a nonsensical concept. In the case that life on Earth has extraterrestrial origins, then life would be pretty much the same elsewhere in the universe as it is today with an existing Earth.

What life without gravity? - Answers

There would be no life. Without gravity there would be no stellar nebulae. Without stellar nebulae there would be no sun nor earth and so no life.
