For those who teach students in psychology, education, and the social sciences, the Handbook of Demonstrations and Activities in the Teaching of Psychology, Second Edition provides practical applications and rich sources of ideas. Revised to include a wealth of new material (56% of the articles are new), these invaluable reference books contain the collective experience of teachers who have successfully dealt with

students' difficulty in mastering important concepts about human behavior. Each volume features a table that lists the articles and identifies the primary and secondary courses in which readers can use each demonstration. Additionally, the subject index facilitates retrieval of articles according to topical headings, and the appendix notes the source as it originally appeared in Teaching of Psychology--especially useful for users needing to cite information. The official journal of the Society for the Teaching of Psychology, Division Two of the American Psychological Association, Teaching of Psychology is a highly respected publication devoted to improving teaching and learning at all educational levels. Volume II consists of 99 articles about teaching physiology, perception, learning, memory, and developmental psychology. Divided into eight sections (four devoted to developmental psychology and one for each of the other specialties), the book suggests ways to stimulate interest, promote participation, collect data, structure field experience, and observe and interact with patients.

Life Span Development Academic Press
Essential Papers on the Psychology of Aging contains the classic papers on the period of human development that begins with young adulthood and ends with old age and death. Including material on theory and methodology; basic psychological processes; personality and social psychology; and clinical, applied, and health psychology, the volume presents the best work published in the field, from classic papers to cutting-edge research. Contributors to the volume include P. B. Baltes, J. E. Birren, W. E. Henry, K. F. Riegel, K. W. Schaie, D. Arenberg, H. P. Bahrick, L. K. Hall, D. B. Bromley, D. M. Burke, L. L. Light, N. Charness, F. I. M. Craik, J. McDowd, J. C. Foster, G. A. Taylor, J. G. Gilbert, J. L. Horn, R. B. Cattrell, H. E. Jones, H. S. Conrad, H. C. Lehman, C. C. Miles, W. R. Miles, A. E. D. Schonfield, E. A. Robertson, K. Sward, A. T. Welford, P. T. Costa, R. R. McCrae, B. L. Frederickson, L. L. Carstensen, D. Gutmann, J. S. Jackson, L. M. Chatters, R. J. Taylor, R. Kastenbaum, N. Kogan, M. E. Life-Span Developmental Psychology Psychology Press

The combined features that distinguish this text from other titles can be summarized with an acronym: CARE C utting edge research A pplied developmental science R eadability E ssential knowledge Written by respected child, adolescent, and adulthood development experts, this authoritative and chronologically organized text presents an integrated perspective on lifespan development. The authors write in an engaging manner, synthesizing biological, social, cultural, and socioeconomic influences as opposed to organizing content around developmental themes. Incorporation of classic and cutting-edge research includes extensive coverage of new research in developmental neuroscience, which has transformed the study of lifespan development by introducing brain maturation. At the same time, the text emphasizes the application of developmental psychology to real world problems, focusing on the ways in which knowledge of child development can inform social policy and practice in the fields of child care, education, mental health, and family life. The text also examines the many fascinating changes that take place through adulthood to help students answer the important question: Who will I become tomorrow? And with a separate epilogue that focuses on death and dying, the book takes students on a developmental journey from our first breath to our last. Reflecting the authors' combined expertise, the broad array of real-life examples resonate with students from different backgrounds and fields of study, and with different occupational goals in mind. With its distinctive and effective combination of cutting-edge research, applications, readability, and essential knowledge, this text helps students understand and appreciate what today's scientists are discovering about human development across the lifespan, how they study the process, and how this knowledge can be used to improve the lives of infants, children, adolescents, and adults around the world. Life-Span Developmental Psychology Macmillan

Life-Span Development Psychology:
Research and Theory covers the issues and

problems associated with a life-span conceptualization of developmental psychology. The book discusses the status, issues, and antecedents of life-span developmental psychology; an approach to theory construction in the psychology of development and aging; and models and theories of development. The text also describes the methodology and research strategy in the study of developmental change; the application of multivariate strategies to problems of measuring and structuring long-term change; and the mechanisms required for the operation of perception and recognition. Learning and retention; language; and intellectual abilities are also considered. Developmental psychologists will find the study invaluable. Life-Span Developmental Psychology McGraw-Hill Humanities, Social Sciences & World Languages

LIFE SPAN DEVELOPMENT: A CASE BOOK uses lively, contemporary case studies to illustrate development transitions and challenges in every stage of life. The authors have chosen these cases for their ability to fascinate, engage, and stimulate. Together with thought-provoking questions for analysis, the case studies create a learning experience that helps readers use multiple perspectives to analyze and interpret life events.

Ebook: Life-Span Development SAGE Publications

This is the first textbook in the expanding field of Applied Developmental Psychology. Most instructors use original primary sources because no text is available. The editors of this volume, Celia Fisher and Richard Lerner, are two world renowned scholars in this field who have utilized their expertise in this area to develop the book. The text features six sections which are organized chronologically (to reflect its emphasis on lifespan development) and an introductory and concluding chapter by Fisher and Lerner which serve as a guide for students and teachers. This edited volume presents an impressive collection of work by the leading researchers in this field on applied topics in lifespan development such as infant care practices, children's memory development within the context of sexual abuse, correlates of adolescent pregnancy and parenthood, and design and evaluation of interventions in nursing homes. The text is targeted at upper-level undergraduates and first year graduate students.

Life-Span Developmental Psychology
Academic Press

This volume presents the reader with a stimulating rich tapestry of essays exploring the nature of action and intentionality, and discussing their role in human development. As the contributions make clear, action is an integrative concept that forms the bridge between our psychological, biological, and

sociocultural worlds. Action is also integrative in the sense of entailing motivational, emotional, and cognitive systems, and this integration too is well represented in the chapters. Action is defined, and distinguished from behavior, according to its intentional quality. Thus, a constantly recurring theme in the volume involves the dialectic of action-intentionality, and specifically the questions of how and when these concepts are to be distinguished.

Life-Span Developmental Psychology SAGE Publications

K. Warner Schaie I am pleased to write a foreword for this interesting volume, particularly as over many years, I have had the privilege of interacting with the editors and a majority of the contributors in various professional roles as a colleague, mentor, or research collaborator. The editors begin their introduction by asking why one would want to read yet another book on human development. They immediately answer their question by pointing out that many developmentally oriented texts and other treatises neglect the theoretical foundations of human development and fail to embed psychological constructs within the multidisciplinary context so essential to understanding development. This volume provides a positive remedy to past deficiencies in volumes on human development with a well-organized structure that leads the reader from a general introduction through the basic processes to methodological issues and the relation of developmental constructs to social context and biological infrastructure. This approach does not surprise. After all, the editors and most of the contributors at one time or another had a connection to the Max Planck Institute of Human Development in Berlin, whether as students, junior scientists, or senior visitors. That institute, under the leadership of Paul Baltes, has been instrumental in pursuing a systematic lifespan approach to the study of cognition and personality. Over the past two decades, it has influenced the careers of a generation of scientists who have advocated long-term studies of human development in an interdisciplinary context.

Case Studies in Lifespan Development
Elsevier

Case Studies in Lifespan Development offers students a comprehensive view into life's key developmental stages through unique, diverse, and moving cases. Author Stephanie M. Wright presents a series of 12 case studies shaped by the contributions of real students—including their observations, concerns, and moments of triumph—to build immersive examples that readers can relate to and enjoy.

LIFE-SPAN DEVELOPMENTAL PSYCHOLOGY Springer Publishing Company

Life-Span Developmental Psychology: Historical and Generational Effects

provides theoretical and methodological frameworks and examples in history-graded influences on life-span development. The book is a compilation of select research papers by sociologists and psychologists in the study of the biological and environmental determinants of development. The topics discussed in the text include the historical and cohort effects; the aims, methods, and problems of research on historical constancy and change; the relationships between history-graded events and normative age-graded (ontogenetic) events; and the investigation of the developing individual in a changing world. Empirical samples of history-graded influence studies of various age cohorts from the United States and other countries are presented as well. Psychologists and sociologists will find the book very insightful. The Developing Person Through the Life Span (paper) Elsevier

Dealing with the methodological and data analytic problems in developmental research, this book presents solutions advanced from the disciplinary perspectives of psychology, behavior analysis and behavioral systems, sociology, and anthropology. Topics addressed include: * the metatheoretical issues about the relationship between data and theory * the identification and analysis of age, cohort, and time-of-measurement effects * the assessment of quantitative and qualitative change * the use of group and single-subject designs for control by systematic variation * the use of systems methodology to investigate the developmental continuity and organization of behavior * the analysis of data from repeated measures designs * the use of structural equations and path analysis to test causal hypotheses * the use of structured relational matrices to study development and change This unique volume offers students an unusually wide range of research tools for identifying and studying specific developmental problems.

Life-span Developmental Psychology: Personality and Socialization Life-span Developmental Psychology; Research and Theory [Papers produced as the result of the First Life-span Developmental Psychology Conference, West Virginia University]. Life Span Developmental Psychology Life-Span Developmental Psychology John Santrock's A Topical Approach to Life-Span Development text continues with the themes of research, applications, and contexts that he is famous for. Students and instructors alike love it for its pedagogy and accessible writing. Building on these strengths, the fourth edition features more current research, more applications including new Careers in Life-Span Development profiles, and a new Visual Assets Database for Instructors. Life-span Developmental Psychology; Research and Theory Cambridge University Press

Part of the authoritative four-volume reference that spans the entire field of child development and has set the standard against which all other scholarly references are compared.

Updated and revised to reflect the new developments in the field, the Handbook of Child Psychology, Sixth Edition contains new chapters on such topics as spirituality, social understanding, and non-verbal communication. Volume 4: Child Psychology in Practice, edited by K. Ann Renninger, Swarthmore College, and Irving E. Sigel, Educational Testing Service, covers child psychology in clinical and educational practice. New topics addressed include educational assessment and evaluation, character education, learning disabilities, mental retardation, media and popular culture, children's health and parenting.

Life-span Developmental Psychology Academic Press

The new edition of The Developing Person Through the Lifespan combines theory and the most up-to-date research with practical

study of development. It addresses the fundamental issues from a chronological point of view, and covers the entirety of the lifespan (not just infancy or adolescence). The book's enhanced pedagogy works alongside the author's lively narrative voice to ensure that this edition remains as user-friendly, if not more so, than its predecessors.
