1. A network of vessels carries a clear fluid called lymph throughout the body. 2. Your skin uses chemicals like sweat and oil to kill pathogens that settle on it. 3. The area around an injury or infection gets hot. 4. Antibodies produced by white blood cells bind to specific pathogens. 5.

Home - Montgomery County Public Schools

(p. 199) Prevention policy as it pertains to infectious diseases has a long history; one which has brought together the clinical, research, and public health communities to develop policies that have been implemented at local, state, and national levels. A prevention policy strategy can be planned for virtually every infectious disease, given that prevention usually means disrupting transmission from an affected individual or source to other vulnerable individuals (or communities).

WHO | Preventing disease through healthy environments: a ...

Dr. Fauci, the longtime director of the National Institute of Allergy and Infectious Diseases, has gained more recognition this year as a member of the coronavirus task force. But he also served as the first director of the NIH's Office of AIDS Research from 1988 to 1994 after serving as the National Institutes of Health's AIDS coordinator.
