Studies in Prose and Verse Cambridge University Press

This is the first book to explore the influence of Japanese art on Aubrey Beardsley's work. Placing Japanese woodblock prints in the English and French cultural milieu of the last third of the Victorian era, Professor Zatlin examines Beardsley's technical and thematic adaptations of Japanese art. She shows how Japanese art enabled Beardsley to create his striking and personal style - one which permanently changed book illustration on three continents. This study is simultaneously a history of the British and French reception of Japanese art, and an examination of the ways Beardsley subverted both Victorian notions of the grotesque and male habits of viewing women. Establishing many of his sources, this book traces Beardsley's revelation of the tensions between the concepts of vice and virtue in a combination of opposites which disconcerted and threatened many viewers of the 1890s. Winner of the Historians of British Art prize for best book on nineteenth-century studies published in English during 1997.

In this pathbreaking study, Fiona I. B. Ng ô examines how geographies of U.S. empire were perceived and enacted during the 1920s and 1930s. Focusing on New York during the height of the Harlem Renaissance, Ng ô traces the city's multiple circuits of jazz music and culture. In considering this cosmopolitan milieu, where immigrants from the Philippines, Cuba, Puerto Rico, Mexico, Japan, and China crossed paths with blacks and white "slummers" in dancehalls and speakeasies, she investigates imperialism's profound impact on racial, gendered, and sexual formations. As nightclubs overflowed with the sights and sounds of distant continents, tropical islands, and exotic bodies, tropes of empire provided both artistic possibilities and policing rationales. These renderings naturalized empire and justified expansion, while establishing transnational modes of social control within and outside the imperial city. Ultimately, Ng ô argues that domestic structures of race and sex during the 1920s and 1930s cannot be understood apart from the imperial ambitions of the United States.

Making Oscar Wilde Cambridge University Press

"A tiny, fastidiously dressed man emerged from Black Philadelphia around the turn of the century to mentor a generation of young artists including Langston Hughes, Zora Neale Hurston, and Jacob Lawrence and call them the New Negro--the creative African Americans whose art, literature, music, and drama would inspire Black people to greatness. [The author] offers the definitive biography of the father of the Harlem Renaissance, based on the extant primary sources of his life and on interviews with those who knew him personally"--Amazon.com.

Queer Kinship after Wilde Johns Hopkins University Press

The poems collected in this volume are expressions of a spirit of self-indulgence, eroticism and moral rebelliousness that emerged in the late Victorian age. They deal with eternal themes of transition, artifice and the ravages of time. It presents the works of writers as Oscar Wilde, Arthur Symons, Rosamund Marriott Watson, and W B Yeats.

Associations in the Greco-Roman World provides students and scholars with a clear and readable resource for greater understanding of the social, cultural, and religious life across the ancient Mediterranean. The authors provide new translations of inscriptions and papyri from hundreds of associations, alongside descriptions of more than two dozen archaeological remains of building sites. Complemented by a substantial annotated bibliography and accompanying images, this sourcebook fills many gaps and allows for future exploration in studies of the Greco-Roman religious world, particularly the nature of Judean and Christian groups at that time.

Michael Wolter provides a detailed, verse-by-verse interpretation of the Third Evangelist. Wolter's commentary fully complements the great tradition of "Handbooks of the New Testament" published by Mohr Siebeck. Replacing the third edition of Erich Klostermann's commentary on Luke, Wolter's volume rightly joins those by Conzelmann (Acts), Käsemann (Romans), and Lietzmann (1 Corinthians) in this venerable series. Wolter's approach to a sustained reading of Luke's Gospel is comprehensive. He carefully places Luke's narrative of Jesus in its cultural context, paying close attention to the relationship of the Gospel with its Jewish and Greco-Roman environment. Wolter performs form-critical and narrative analysis of the specific stories; however, Wolter also emphasizes Luke as a theologian and his Gospel as a work of theology. Wolter recognizes how Luke's narrative of Jesus forms the first part

of a unified work--the Acts of Apostles being the second--that represents a new moment in Israel's history. But in surprising new ways, Wolter makes clear that it is God alone who works in and through the words and deeds of Jesus to bring salvation to Israel. His commentary shows that Luke succeeds in preserving the history of Jesus and its theological impact and that this history stands on equal footing with the history of early Christianity. Wolter's thorough, careful reading follows Luke as the Evangelist seeks to explain how the fulfillment of the Old Testament promises of God for Israel results in a parting of the ways between the Christian church on the one side and Judaism on the other. Scholars and students alike will benefit from access to new German scholarship now available to English-language audiences. - from publisher.

"Birren presents a kaleidoscopic view of color information that has been a source of fascination..." - Color Research and Application "Keeps up with the latest developments in biology and psychology where light and color are involved." - AIA Journal Here is a major work by one of the best-known color authorities in the world. Faber Birren pioneered in the field of "functional" color, using color properties to promote human welfare psychologically, visually, and physiologically; in this volume he has assembled a wealth of information on the subject. Color and Human Response offers intriguing factual and hypothetical observations on the influences of color in life, supported by historical references and the latest scientific data. Birren explores the biological, visual, emotional, aesthetic, and psychic responses to color - referring both to ancient symbolic uses of color as well as its application in the modern environment. His specifications for color in homes, offices, hospitals, and schools are geared toward relieving modern tensions and anxieties. Complete with drawings, color photographs, and a chapter on the personal meaning of color preferences, Color and Human Response will fascinate anyone concerned with the human environment, including scientists and psychologists. It has become a basic reference for architects, teachers, and interior and industrial designers.
