Rail Saint-Anne-de-Beaupr é ,
Qu é bec? : s.n., 198

Throughout history, women in
many countries have been denied
suffrage, or the right to vote.

Women's suffrage was first
highlighted as an issue in Britain
with the publication of Mary
Wollstonecraft's A Vindication of
the Rights of Woman in 1792. In
the following century, people

advocated for women's suffrage more and more. In the United States, leaders of the women's suffrage movement included Lucretia Mott, Elizabeth Cady Stanton, Lucy Stone, and Susan B. Anthony. As a result of their hard work, the 19th Amendment to the U.S. Constitution prevented women from being denied suffrage. They now had the same voting rights as men. Primary sources in the form of photographs, first-hand accounts, publications from the movement, and drawings allow readers to gain insight into the difficulties women faced in their fight for voting rights. Sidebars encourage readers to ask and answer questions pertaining to women's suffrage.

Supernatural

A Question of Science The
Rosen Publishing Group, Inc

• Is there really such a thing as a blue moon? • What time is it at the North Pole? • Why

don't woodpeckers get concussed? • Why don't snorers wake themselves with the racket they make? • Do insects sleep? These are just a few of the intriguing questions asked and answered in *The Quirks & Quarks Question Book*, the first question and answer book to come out of CBC Radio's enormously popular weekly science program. *Quirks & Quarks* producers have combed through ten years' worth of archives to find the most puzzling questions – or the most fascinating answers to apparently simple questions – from the program's Question of the Week segment or its once-a-season all-question show. The scientists and researchers with the answers (many of whom updated their answers for the book in light of new research findings) come from all scientific disciplines and all parts of the country. What they have in common is their ability to explain serious, complicated science in layman's terms.

This isn't science made simple, but science made understandable. Introduced by the program's host for the past ten years, the genial and ever-curious Bob McDonald, The Quirks & Quarks Question Book has the answers to questions you may never have thought to ask (why does Uranus spin on a different axis from all the other planets in our solar system?) or have spent idle time wondering about (why is there a calm before a storm?). Whether you want to know if you can sweat while you swim or what the view would be like if you could travel at the speed of light, or perhaps you just want to peruse the latest scientific thinking on a wide range of topics, The Quirks & Quarks Question Book has the answer. Quirks & Quarks has been keeping Canadians up to date on the world of science for more than 25 years. Every week, the program presents the people behind the latest discoveries in the physical and natural sciences. The program

also examines the political, social, environmental, and ethical implications of new developments in science and technology. Over its lifetime, Quirks & Quarks has won more than 40 national and international awards for science journalism.

The Supernatural Quiz Book Season 12
Wayland
A comprehensive illustrated exploration of the fascinating science of color Arielle and Joann Eckstut, authors of *The Secret Language of Color*, offer a thorough, readable, and highly visual exploration of the science of color. Organized by 50 of the most essential questions about color across a variety of fields—physics, chemistry, biology, technology, and psychology—this book examines how and why we see

color; how color relates to light; what the real primary colors are; how biology, language, and culture affect the colors that we see; and much more. Full of clear and elegant infographics, *What Is Color?* is a must-have for artists and designers, scientists, students, and decorators, and anyone else whose work or play involves color.

*Questions and
Answers About
Women's Suffrage*

The Salem witch
trials marked one of
the darkest moments
in U.S. history. In
1692, two young
children were
accused of being
"bewitched" and were
arrested. More than
150 arrests occurred
over the next two
months, and a
special court was
created to try the
cases. A total of 20
people were found
guilty of being
witches, and all of
them were hanged.
Inside this

compelling volume, Seasons 7, 8 & 9 on all readers are presented aspects of the series. with the facts of the What Is Color? Salem witch trials Grade 3 Science through primary Multiple Choice sources from the era. movement, shape of
solid, solid, solid-
state, and state of
matter. "Other Sources

of Heat and Light MCQ" chapter covers quiz about body temperature, electrical heat and light, electrical machines, friction, lubricant, machines, mechanical energy, mechanical heat, non-lubricated, solar energy, and tools for producing mechanical energy. "Sun MCQ" chapter covers quiz about body temperature, environment, sun as a source of heat and light. "Water MCQ" chapter covers quiz about crystals, fog, water forms, groundwater, spring, state of water, vapors, and well. "What is Alive MCQ" chapter covers quiz about adapt, aquarium, desert, environment. *A Textbook on Light. Questions*

and Answers
Sound and light aren't just sensations picked up by our senses—they're examples of science at work in the wonderful world around us! Budding scientists will delight in the text's age-appropriate experiments, which are made easy through step-by-step instructions and photos. Each experiment is accompanied by a question-and-answer feature that answers common questions encountered while experimenting, and a concluding quiz

tests reader's knowledge of these important science concepts.
