worked out answers for all activities in the Learner's Book * photocopiable record sheets and templates. Also provides a comprehensive Learner's Book.

The Low Achievement Trap
Gazelle Distribution
Zurich, summer 1912.

Albert Einstein has just returned from Prague to the city on the Limmat. He sends a plea for help to his former fellow student, the mathematician Marcel Grossmann (1878-1936), for he is in need of assistance with the mathematical calculations of his general theory of relativity. What then follows is one of the most fascinating chapters of science history, with far-reaching consequences for the lives of the two friends. Marcel

Grossmann ' s granddaughter paints here a picture of a fiery and many-talented scientist and patriot. She traces the influence of an entrepreneurial family during Germany ' s rapid industrial expansion in the late 19th century. The family ' s fluctuating fortunes take the story to the vibrant city of Budapest on the Danube; they enable readers to sense the pioneering spirit at Zurich ' s young Polytechnic Institute (now ETH Zurich) – but also reflect the worries and hardships of the First World War and interwar years. The Foreword is written by Prof. Remo Ruffini, founder and president of the International Center for Relativistic Astrophysics and the Marcel Grossmann Meetings.

Last but not least, an extensive contribution by Dr. Tilman Sauer offers a scientific-historical appreciation of Marcel Grossmann ' s enduring contributions.

Topics discussed herein include gender and ethics in qualitative interviewing; cognition, consciousness and business ethics; a philosophical perspectives on the labour/trade link; corruption in public and

private organisations; environmental ethics; and biomedical ethics.

Twice Freed
"The Low Achievement Trap: Comparing schools in Botswana and South Africa is an empirical study of student mathematics learning in Grade 6 classrooms that is unique in its focus on two school systems shaped by different political histories on either side of the Botswana-South Africa border. The study provides a detailed examination of the capacity of teachers – how they teach, how much they teach, and what they teach. Because of this wealth of detail, The Low Achievement Trap gives us much greater insight than previous research into why students seem to be making larger gains in the classrooms of South Eastern Botswana than in those of North West Province, South Africa. Rather than identifying a

single major factor to explain this difference, the study finds that a composite of inter-related variables revolving around teachers' mathematics knowledge and their capacity to teach mathematics are crucial to improving education in both regions. The message is a hopeful one: good teachers can make a difference in student learning"--Publisher's website.

Corporate Practices and Conduct
