Analysis in Qualitative Research Meridian: Crossing Aesthetics

Why does ethnicity matter in certain societies and contexts but not in others? Drawing on the boundary-making perspective first championed by anthropologist Fredrick Barth, Andreas Wimmer introduces a comparative analytic of ethnic group formation. He analyzes how and why ethnic boundaries are sometimes associated with inequality and exclusion, with political salience and public debate, with enduring loyalty and thick identities, while in other cases ethnicity and race do not structure the allocation of resources, invite little political passion, and represent only secondary aspects of individual identity. Wimmer argues that three key mechanisms influence the dynamics and consequences of ethnic boundary-making: institutional incentives, the distribution of power between individuals, and the reach of pre-existing social networks. Cautioning against seeing ethnicity wherever one looks, Wimmer argues for disentangling ethnic and non-ethnic group formation processes and proposes a set of research designs, analytical principles, and strategies of interpretation appropriate for the task. Several qualitative and

quantitative studies then apply this agenda : on how local residents in immigrant neighborhoods draw symbolic boundaries against each other, on the ethnic and racial composition of friendship networks, and how ethnic closure influences cultural values. By overcoming essentialist approaches to ethnicity while avoiding the pitfalls of excessive constructivism, Ethnic Boundary Making offers a new perspective on a topic of vital interest to sociologists, anthropologists, and ethnic studies scholars.

Understanding Media Cultures Routledge
Challenging the popular myth of a present-day 'information revolution', Media Technology and Society is essential reading for anyone interested in the social impact of technological change. Winston argues that the development of new media forms, from the telegraph and the telephone to computers, satellite and virtual reality, is the product of a constant play-off between social necessity and suppression: the unwritten law by which new technologies are introduced into society only insofar as their disruptive potential is limited.

Swedish Immigration Research Geddes & Grosset, Limited

Containing meticulous, up-to-date scholarship yet written in a flowing, enjoyable style, this comprehensive book takes readers on a journey through a breathtaking array of literary texts, encompassing the literature of Israel, early Judaism, the Greco-Roman world, and the New Testament. John R. Levison's skill with ancient texts -- already demonstrated in his acclaimed *The Spirit in First-Century Judaism* -- is here extended to a myriad of

other expressions of the Spirit in antiquity.

Communication Theory SAGE

We're all brought up to be polite, but there are times when you have to raise your voice. Giving in to other people all the time only leads to feelings of resentment, yet when you do make a stand for yourself you feel guilty. Dr Hauck does away with these negative feelings and shows you how to feel good about being yourself. His practical advice and sound reasoning help you to get your own way without taking advantage of other people.

New Media Adrenaline Moto

Readers will discover that it is not possible to disengage John Howard Yoder's practice of ecumenical dialogue from his vision of the church. Yoder's approach to ecumenical dialogue correlates with his conception of the faithfulness of the church. His vision of the church poses challenges for Christians of all communions because he calls both for disciplined dialogue and for faithful servanthood that renders the confession of Jesus Christ's lordship meaningful. This collection of 17 essays on themes ecclesiological and ecumenical is intended to demonstrate the substantial unity of Yoder's work over the past four decades. Many of these essays are often cited by researchers but have been till now unobtainable. Three of these texts have never been published before. Editor Michael Cartwright has contributed a substantial introduction on the "Yoderian" project, and a select bibliography prepared by Mark Nation catalogs Yoder's writings—published and unpublished—on ecclesiology and ecumenism.

Body Politics A&C Black

This book is a commentary on all the major biblical texts dealing with the Spirit, from Genesis to Revelation. It is an invaluable reference book for students, teachers, ministers, Bible study groups, or anyone interested in the Person and work in the Holy Spirit. It perhaps found its widest use during the Charismatic renewal among both Protestants and Catholics, and has remained a classic ever since. The author, George T. Montague, has not only provided a rich and thoughtful commentary on individual passages, but he has, by the nature of this work, offered a multifaceted overview of the growth of the biblical doctrine on the Spirit covering many centuries. From the time of the Yahwist, when the Spirit was pictured as God's

breath of life, to the personalized understanding of the Spirit in the Fourth Gospel, the biblical doctrine of the Spirit has evidenced steady development. Using the findings of reliable scholarship, but never burdening the reader with academic trivialities, Professor Montague places a wealth of theological knowledge within the grasp of persons seeking to learn more about the Holy Spirit and striving to enrich their own spirituality. *Rethinking Christ and Culture* SAGE

Narrative Theology is still with us, to the delight of some and to the chagrin of others. "Why Narrative?" is in reprint because it represents what is still a very important question. This diverse collection of essays on narrative theology has proven very useful in university and seminary theology classes. It is also of great use as a primer for the educated layperson or church study group. Jones and Hauerwas have done an excellent job of selecting representative essays that deal with appeals to narrative in areas such as personal identity and human action, biblical hermeneutics, epistemology, and theological and ethical method.

At the Bottom of the Garden Wipf and Stock Publishers
In 1951, theologian H. Richard Niebuhr published *Christ and Culture*, a hugely influential book that set the agenda for the church and cultural engagement for the next several decades. But Niebuhr's model was devised in and for a predominantly Christian cultural setting. How do we best understand the church and its writers in a world that is less and less Christian? Craig Carter critiques Niebuhr's still pervasive models and proposes a typology better suited to mission after Christendom. *The Holy Spirit* SAGE Publications

This concise introduction to the development of communication theory offers an historical account of the development of all theoretical approaches, including the Chicago school, constructivism, structuralism and ethnomethodology.

Official Gazette of the United States Patent and Trademark Office Wm. B. Eerdmans Publishing

This is the definitive analysis of art as a social and perceptual system by Germany's leading social theorist of the late 20th century. It combines three decades of research in the social sciences, phenomenology, evolutionary biology, cybernetics, and information theory with an intimate knowledge of art history, literature, aesthetics, and contemporary literary theory. *Scottish Jokes* SAGE

Binding and loosing, baptism, eucharist, multiplicity of gifts, and

open meeting; these five New Testament practices were central in the life of the early Christian community. Some of them are still echoed in the practice of the church today. But the full social, ethical, and communal meaning of the original practices has often been covered by centuries of ritual and interpretation. John Howard Yoder, in his inimitably direct and discerning style, uncovers the original meaning of the five practices and shows why the recovery of these practices is so important for the social, economic, and political witness of the church today.

Motorship MennoMedia, Inc.

"This is a very clear and concise summary of media studies, present and future. There is no other book that can both be used as a teaching tool and can help scholars organize their thinking about new media as this book can?" - Steve Jones, University of Chicago This book offers an introduction to communication theory that is appropriate to our post-broadcast, interactive, media environment. The author contrasts the "first media age" of broadcast with the "second media age" of interactivity. Communication Theory argues that the different kinds of communication dynamics found in cyberspace demand a reassessment of the methodologies used to explore media, as well as new understandings of the concepts of interaction and community (virtual communities and broadcast communities). The media are examined not simply in terms of content, but also in terms of medium and network forms. Holmes also explores the differences between analogue and digital cultures, and between cyberspace and virtual reality. The book serves both as an upper level textbook for New Media courses and a good general guide to understanding the sociological complexities of the modern communications environment.

The Conversion of Iceland Cambridge University Press

What is it like to be Jewish and to be born and raised in Germany after the Holocaust? Based on remarkably candid interviews with nearly one hundred German Jews, Lynn Rapaport's book reveals a rare understanding of how the memory of the Holocaust shapes Jews' everyday lives. As their views of non-Jewish Germans and of themselves, their political integration into German society, and their friendships and relationships with Germans are subtly uncovered, the obstacles to readjustment when sociocultural memory is still present are better understood. This is also a book about Jewish identity in the midst of modernity. It shows how the boundaries of ethnicity are not marked by how religious Jews are, or their absorption of traditional culture, but by the moral distinctions rooted in Holocaust memory that Jews draw between themselves and other Germans. Jews in Germany after the Holocaust has won an award for being the best book in the sociology of religion from the American Sociological Association.

The Sayings of Winston Churchill University of Notre Dame Press
Written for anyone beginning a research project, this introductory book takes you through the process of analysing your data from start to finish. The author sets out an easy-to-use model for coding data in order to break it down into parts, and then to reassemble it to create a meaningful picture of the phenomenon under study. Full of useful advice, the book guides the reader through the last difficult integrating phase of qualitative analysis including diagramming, memoing, thinking aloud, and using one's feelings, and how to incorporate the use of software where appropriate. Ideal for third year undergraduate students, master students, postgraduates and anybody beginning a research project, the book includes examples covering a wide range of subjects - making the book useful for students across the social science disciplines. Hennie Boeije is currently an Associate Professor with the Department of Methodology and Statistics of the Faculty of Social and Behavioural Sciences at Utrecht University, The Netherlands.

Theories of Communication Viking S on

Wilf Hildebrandt carefully explores the meaning of "the Spirit" in the Old Testament. He examines the role of God's Spirit in creation, in the establishment and preservation of God's people, in prophecy, and in Israel's leadership. He unveils the central role that the Spirit plays in creatively bringing about the directives of God. Through the Spirit, God brings order out of chaos, ushers the invisible into reality, makes a separation between the sacred and the profane, enables specific people to meet particular needs, and supersedes natural laws. This work sheds light on the Spirit of God in both the Old Testament and the New Testament.

Ethnic Boundary Making Routledge

A "comprehensive and fascinating study" of how wind has shaped the world as we know it, affecting all aspects of human and natural life—from geography to political history, plant life to psychology, and biology to philosophy (The Observer) Wind is everywhere and nowhere. Wind is the circulatory system of the earth, and its nervous system, too. Energy and information flow through it. It brings warmth and water, enriches and strips away the soil, aerates the globe. Wind shapes the lives of animals, humans among them. Trade follows the path of the wind, as empire also does. Wind made the difference in wars between the Greeks and Persians, the Mongols and the Japanese. Wind helped to destroy the Spanish Armada. And wind is no less determining of our inner lives: the föhn, mistral, sirocco, Santa Ana, and other "ill winds" of the world are correlated with

disease, suicide, and even murder. *Heaven's Breath* is an encyclopedic and enchanting book that opens dazzling new perspectives on history, nature, and humanity.

An Old Testament Theology of the Spirit of God Wipf and Stock Publishers

For Luke, argues Turner, the Spirit came upon Jesus in order to endow him with the power and wisdom to purge Israel and initiate its restoration. Likewise, the Spirit came upon the early Christian community, not merely to empower it for mission but principally to reshape it in fulfillment of the hopes expressed in Luke 1-2. Thus the Spirit is no mere added gift, but looks towards the salvation of the community as well as for its witness. This substantial study of Luke's theology is also a sympathetic critique of the classical Pentecostal view of the Spirit.

Official Gazette of the United States Patent Office Indy Tech Publishing

At the Bottom of the Garden is a history of fairies from the ancient world to the present. Steeped in folklore and fantasy, it is a rich and diverse account of the part that fairies and fairy stories have played in culture and society. The pretty pastel world of gauzy-winged things who grant wishes and make dreams come true—as brought to you by Disney's fairies flitting across a woodland glade, or Tinkerbell's magic wand—is predated by a darker, denser world of gorgons, goblins, and gello; the ancient antecedents of Shakespeare's mischievous Puck or J.M. Barrie's Peter Pan. For, as Diane Purkiss explains in this engrossing history, ancient fairies were born of fear: fear of the dark, of death, and of other great rites of passage, birth and sex. To understand the importance of these early fairies to pre-industrial peoples, we need to recover that sense of dread. This book begins with the earliest manifestations of fairies in ancient civilizations of the Mediterranean. The child-killing demons and nymphs of these cultures are the joint ancestors of the medieval fairies of northern Europe, when fairy figures provided a bridge between the secular and the sacred. Fairies abducted babies and virgins, spirited away young men who were seduced by fairy queens and remained suspended in liminal states. Tamed by Shakespeare's view of the spirit world, Victorian fairies fluttered across the theater stage and the pages of children's books to reappear a century later as detergent trade marks and alien abductors. In learning about these often strange and mysterious creatures, we learn something about ourselves—our fears and our desires.
